Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Backend Software Engineer with 2+ years building **Python/FastAPI services**, cloud integrations, relational data systems, automation, and internal tools using Azure, Docker, CI/CD, monitoring, access controls, and production troubleshooting.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Operating Systems, Software Engineering, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Database Management, Computer Networks, Software Engineering

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, California*

- Architected a multi-tenant platform using Azure SQL and Blob Storage with row-level access controls and normalized schemas for 500+ users, reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Built FastAPI integrations across PostgreSQL, SQL Server, and cloud storage, processing 5K+ monthly jobs with incremental updates, reconciliation, error handling, monitoring, and automated releases sustaining 99%+ reliability.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, California*

- Designed concurrent Python processing and secure multi-format ingestion through REST APIs and AWS RDS, executing 1K+ files per batch with fault-tolerant recovery, usage tracking, and stable performance.
- Built responsive operational interfaces for uploads, history, configuration, and live feedback, reducing turnaround 60% while supporting production workflows and technical troubleshooting for 150+ instructors across multiple courses.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer, SecureSync *India*

- Designed object-oriented API integrations and AWS Glue transformations for JSON, CSV, and Parquet data, improving response times 30%, increasing pipeline efficiency 68%, and reducing technical debt 20%.
- Automated nightly builds, installations, tests, and operational reports through Jenkins, validating synchronization across Windows, Linux, and macOS while diagnosing failures and coordinating releases with distributed engineering stakeholders.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern, VibrantChem *India*

- Implemented eight MERN microservices spanning authentication, permissions, billing, resources, customers, leads, and notifications, reliably synchronizing 2M+ records through REST APIs and event-driven WebSocket updates across business workflows.
- Automated Docker deployments through Jenkins CI/CD with unit, integration, and end-to-end validation, achieving 95%+ successful builds while integrating Azure Monitor, Sentry, and secure production release checks with reliable rollbacks.

Skills

Backend & Data: Python, FastAPI, Flask, Java, JavaScript, TypeScript, SQL, REST APIs, Webhooks, Microservices, PostgreSQL, SQL Server, MySQL, MongoDB, Firebase
Cloud & Automation: Microsoft Azure, Azure SQL, Azure Monitor, AWS S3, AWS RDS, AWS Glue, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Bash, Linux
Observability & Support: Grafana, Sentry, Splunk, Monitoring, Logging, Root Cause Analysis, Debugging, Access Control, User Permissions, TCP/IP, System Administration, Technical Documentation
Engineering: Git, GitHub, Postman, JIRA, Unit Testing, Integration Testing, End-to-End Testing, Agile/Scrum, Code Reviews, System Design, Performance Optimization, ETL Pipelines, Workflow Automation, LLM Systems, Cross-Functional Collaboration

Projects

FinNexus Live | *TypeScript, Kubernetes, MongoDB, Plaid, WebSockets*

- Built a scalable platform supporting 50K+ users and 1M+ transactions with secure service integrations, real-time synchronization, advanced filtering, tokenized access, and Kubernetes-based deployment automation for reliable operations.

Chat2SQL Code | *Java, TypeScript, SQL, PostgreSQL, Docker, Maven*

- Built a cross-platform database workspace supporting 10+ database systems, combining schema exploration, SQL generation, synchronization, and local deployment through Java, TypeScript, Docker, Maven, Node.js, and Yarn for developer productivity.

Big-Brain Live | *LLaMA-2, FAISS, Pinecone, PostgreSQL, GCP*

- Built an AI-assisted document platform with secure ingestion, semantic retrieval, summarization, and collaborative workflows, maintaining 95% query accuracy across 50K+ documents while reducing review time 60% through dependable automation.
