Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building **CRM-style workflows**, **REST API integrations**, secure web applications, and governed data systems using TypeScript, JavaScript, React, HTML/CSS, SQL, AWS, and Azure.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Data Retrieval, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, California*

- Architected a multi-tenant platform using Azure SQL and Blob Storage with row-level isolation and normalized schemas for 500+ users, reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Built FastAPI data integrations across PostgreSQL, SQL Server, and cloud storage, processing 5K+ monthly jobs with schema validation, reconciliation checks, error handling, and 99%+ measured production reliability.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, California*

- Built React interfaces and Python services for uploads, history, configuration, and live feedback, reducing user turnaround 60% while supporting reliable production operational workflows used by 150+ instructors.
- Designed secure multi-format ingestion and concurrent processing through REST APIs and AWS RDS, evaluating 10K+ daily submissions with recoverable execution, usage tracking, and 90%+ measured grading consistency.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer, SecureSync *India*

- Designed API and data-transformation flows using OOP, AWS Glue, S3, JSON, CSV, and Parquet, improving response times 30% and ETL efficiency 68% while reducing technical debt 20%.
- Automated nightly builds, installations, integration tests, unit tests, and CSV reporting through scheduled Jenkins jobs, validating reliable cross-system synchronization across Windows, Linux, and macOS production release environments.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern, VibrantChem *India*

- Implemented eight **CRM microservices** for authentication, permissions, billing, resources, customers, leads, and notifications, reliably synchronizing 2M+ records through REST APIs and event-driven WebSocket updates across production workflows.
- Built responsive React workflows and Docker deployments through Jenkins CI/CD, achieving 95%+ validation while integrating Sentry, Azure Monitor, Kibana, and Google Analytics for operational and user insights.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Developed Flask APIs, payment webhooks, pricing, and coupon workflows while synchronizing Firebase booking events and processing hourly Databricks micro-batches across 50K+ records with consistently reliable sub-200-millisecond responses.
- Designed end-to-end workflows, mapped 12+ integration points, and presented technical solutions to client stakeholders, reducing design errors 25% while supporting effective collaborative cross-functional implementation planning and alignment.

Skills

Web & Languages: HTML, CSS, JavaScript, TypeScript, Python, Java, SQL, React, Next.js, Angular, TailwindCSS
Integrations: REST APIs, Webhooks, JSON, XML, JWT, WebSockets, FastAPI, Flask, Node.js, Express.js, Microservices
Data & Platforms: CRM Workflows, Schema Design, Data Validation, Reconciliation, PostgreSQL, SQL Server, Azure SQL, MySQL, MongoDB, Firebase
Delivery & Support: AWS, Azure, Docker, Jenkins, CI/CD, Git, Postman, Agile/Scrum, Unit Testing, Integration Testing, Debugging, Monitoring, Sentry, Google Analytics, Stakeholder Communication

Projects

HMIS - Hospital Management Information System Live | *TypeScript, MERN, ABDM APIs, Sentry*

- Implemented consent-based patient-history access, role-oriented healthcare workflows, Twilio appointment alerts, Sentry monitoring, and scalable TypeScript services supporting 100+ daily appointment operations while reducing administrative workload by 30%.

FinNexus Live | *Next.js, TypeScript, MongoDB, WebSockets*

- Built a TypeScript application supporting 50K+ users and 1M+ transactions with secure third-party integrations, real-time synchronization, advanced audience-style filtering, and reliable containerized deployment workflows at production scale.

Big-Brain Live | *PostgreSQL, GCP, REST APIs, Clerk*

- Built secure document upload, management, and collaborative workflows for 200+ users with Clerk authentication, PostgreSQL-backed metadata, real-time summarization, and optimized retrieval pipelines that reduced review time 60%.
