Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer pursuing an MSCS at USC with 2+ years building **SaaS-style full-stack applications**, **SQL-backed services**, and modern web interfaces, with strong experience in testing, debugging, code reviews, and production reliability.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Designed and optimized SQL-backed multi-tenant application workflows supporting 500+ users, reducing latency from **1.2s to 350ms** through query tuning, indexing, and structured backend improvements.
- Built ETL-style integration pipelines processing 5,000+ monthly jobs with validation, reconciliation, and CI/CD-backed releases, improving production reliability and accelerating resolution of runtime and data issues.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed full-stack React and Flask features handling 10,000+ daily requests, contributing to new functionality, debugging issues, and improving maintainability through clearer APIs, testing, and release practices.
- Implemented secure batch-processing workflows for PDF, DOCX, and ZIP ingestion with AWS-backed persistence, reducing feedback turnaround by **60%** while supporting stable user-facing production operations.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Built Python-based evaluation pipelines across 100,000+ records, creating reproducible reporting and debugging artifacts that improved system understanding, implementation quality, and technical communication.
- Produced technical reports and targeted validation scenarios translating findings into actionable guidance, strengthening design-review discussions, reducing handoff ambiguity, and supporting better engineering decisions across teams.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered cross-platform API and ETL microservices using Python, AWS Glue, and S3, improving response time by **30%** while supporting scalable integrations and reliable production delivery workflows.
- Maintained 20+ automated test suites using Jenkins, PyTest, and Mockito, increasing CI reliability by **68%**, reducing regressions, and improving release confidence across collaborative engineering teams.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a MERN-based resource management platform with WebSockets and REST APIs, supporting 2M+ synchronized records and six workflows through modular service boundaries and responsive web interfaces.
- Deployed Azure SQL with Jenkins-based CI/CD and automated testing, achieving 95%+ successful build validation while improving release consistency and production-readiness across delivery cycles.

Skills

Languages: Java, JavaScript/TypeScript, Python, SQL, C++, Bash
Frontend: Angular familiarity, React, Next.js, HTML, CSS/SCSS, responsive UI development
Backend & Data: C#/.NET familiarity, Flask, FastAPI, Node.js, REST APIs, SQL Server, PostgreSQL, MySQL, Dapper/Entity Framework concepts
Testing & Ops: xUnit/Moq concepts, Postman, Jest, Git/GitHub, Jenkins, Splunk/DataDog familiarity, CI/CD, debugging, performance monitoring

Projects

PiXMod Live | *Next.js, MongoDB, Stripe, Transformers*
- Built an AI-powered SaaS web platform for image editing and search, integrating scalable storage, responsive interfaces, and premium billing while improving conversion by **18%** through polished user experiences.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an AI-powered SQL workspace supporting 10+ databases, maintaining Java and TypeScript modules that accelerated schema exploration, query authoring, and structured debugging of data workflows.

Linguistix Code | *Python, AWS, Docker, CI/CD*
- Developed a containerized RESTful data processing API on AWS with automated CI/CD releases and validation checks, improving deployment reliability, interoperability, and supportability for production SaaS-style workflows.
