Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer pursuing an MSCS at USC with 2+ years building and maintaining **SQL-backed web platforms**, **JavaScript/Python services**, and AI-enabled workflows, with strong experience in Git-based collaboration, testing, and production support.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Designed and maintained multi-tenant data services supporting 500+ users, reducing latency from **1.2s to 350ms** by refining SQL access patterns, schema design, and backend request workflows.
- Built ETL-style integration pipelines processing 5,000+ monthly jobs with validation, reconciliation, and release checks, improving reliability and accelerating issue resolution across production code paths.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed full-stack web platform features handling 10,000+ daily requests, maintaining APIs, interfaces, and persistence layers while improving testing coverage and day-to-day codebase stability.
- Implemented secure batch-processing workflows for PDF, DOCX, and ZIP ingestion with AWS-backed persistence, reducing feedback turnaround by **60%** while supporting maintainable production operations.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Built Python-based evaluation pipelines across 100,000+ records, creating reproducible workflows and debugging artifacts that improved analysis quality and made technical findings easier to communicate.
- Produced technical reports and validation scenarios translating findings into actionable guidance, improving collaboration, reducing handoff ambiguity, and strengthening implementation quality across iterative development cycles.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered cross-platform API and ETL services using Python, AWS Glue, and S3, improving response time by **30%** while maintaining scalable integrations and structured Git-based delivery workflows.
- Maintained 20+ automated test suites using Jenkins, PyTest, and Mockito, increasing CI reliability by **68%**, reducing regressions, and improving confidence during ongoing codebase maintenance.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a MERN-based resource management platform with WebSockets and REST APIs, supporting 2M+ synchronized records and six core business workflows through maintainable modular application components.
- Deployed Azure SQL with Jenkins-based CI/CD and automated testing, achieving 95%+ successful build validation while improving release consistency and production-readiness across delivery cycles.

Skills

Languages: JavaScript/TypeScript, Python, SQL, Java, C++, Bash
Web Development: React, Next.js, Node.js, Flask, FastAPI, REST APIs, jQuery familiarity, responsive web workflows
Databases: PostgreSQL, MySQL, SQL Server, MongoDB, relational schema design, query tuning
Tools & Delivery: Git/GitHub, Docker, Jenkins, AWS, Azure, CI/CD, automated testing, production support

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an AI-powered SQL workspace supporting 10+ databases, maintaining Java and TypeScript modules that accelerated schema exploration, query authoring, and structured data workflows.

PiXMod Live | *Next.js, MongoDB, Stripe, Transformers*
- Built an AI-powered SaaS web platform for image editing and search, integrating MongoDB-backed workflows, scalable storage, and premium billing while improving conversion by **18%**.

Big-Brain Live | *LLaMA-2, FAISS, PostgreSQL, GCP*
- Built a secure document platform with semantic search and summarization over 50K+ documents, combining SQL-backed metadata, retrieval pipelines, and maintainable web workflows for AI-driven use cases.
