Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer pursuing an MSCS at USC with 2+ years building **full-stack web applications**, **API-driven backend services**, and cloud workflows, with experience in Angular/React-style frontend delivery, SQL-backed systems, and Azure/AWS deployment pipelines.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Designed and optimized SQL-backed multi-tenant application workflows supporting 500+ users, reducing latency from **1.2s to 350ms** through query tuning, indexed access patterns, and structured backend improvements.
- Built ETL-style integration pipelines using FastAPI, SQL Server, and cloud storage, processing 5,000+ monthly jobs with validation and CI/CD-backed releases for **99%+** production reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed full-stack React and Flask features handling 10,000+ daily requests, translating requirements into responsive interfaces and maintainable APIs while improving usability, testing discipline, and release confidence.
- Implemented secure batch-processing workflows for PDF, DOCX, and ZIP ingestion with AWS-backed persistence, reducing feedback turnaround by **60%** while supporting stable production operations under peak usage.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Built Python experimentation pipelines across 100,000+ records, enabling reproducible evaluation and proof-of-concept iteration while improving debugging quality and communication of model-driven system behavior.
- Produced technical reports and targeted validation scenarios translating findings into actionable improvements, strengthening design reviews, reducing handoff ambiguity, and supporting better engineering decisions across collaborators.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered API and ETL microservices using Python, AWS Glue, and S3, improving response time by **30%** while supporting distributed integrations, scalable data movement, and reliable production workflows.
- Maintained 20+ automated test suites using Jenkins, PyTest, and Mockito, increasing CI reliability by **68%**, reducing regressions, and improving release confidence across collaborative engineering teams.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a MERN-based resource management platform with WebSockets and REST APIs, supporting 2M+ synchronized records and six workflows through modular service boundaries and responsive web interfaces.
- Deployed Azure SQL with Jenkins-based CI/CD and automated testing, achieving 95%+ successful build validation while improving release consistency and production-readiness across delivery cycles.

Skills

Languages: C#, JavaScript/TypeScript, Python, Java, SQL, C++
Frontend: Angular familiarity, React, Next.js, HTML, CSS/SCSS, responsive UI development
Backend & APIs: .NET Core familiarity, Flask, FastAPI, Node.js, REST APIs, microservices, backend service design
Cloud & Delivery: Azure SQL, Azure familiarity, AWS, Docker, Kubernetes, Git/GitHub, Jenkins, DevOps pipelines, CI/CD

Projects

PiXMod Live | *Next.js, MongoDB, Stripe, Transformers*
- Built an AI-powered SaaS web platform for image editing and search, integrating scalable storage, responsive interfaces, and premium billing while improving conversion by **18%** through polished experiences.

FinNexus Code | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built a secure fintech platform supporting 50,000+ users and 1M+ transactions, combining TypeScript, Kubernetes, and real-time updates to demonstrate scalable full-stack application patterns.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an AI-powered SQL workspace supporting 10+ databases, maintaining Java and TypeScript modules that accelerated schema exploration, query authoring, and structured debugging of data workflows.
