Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Product-minded software engineer pursuing an MSCS at USC with 2+ years building **React/TypeScript interfaces**, **backend APIs**, and **fintech-adjacent workflows**, shipping user-facing features, payment experiences, and scalable data-backed systems.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **Python-first platform services** for 500+ users, reducing request latency from **1.2s to 350ms** by optimizing execution paths, tuning SQL patterns, and improving responsiveness for customer-facing analytics workflows.
- Implemented **automated validation and ETL checks** for 5,000+ monthly jobs, reducing downstream failures while improving release confidence, runtime observability, and reliability across recurring production data-processing and reconciliation workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **full-stack product features and APIs** handling 10,000+ daily requests, translating instructor needs into maintainable backend services and polished interfaces while improving delivery predictability through clearer ownership and sequencing.
- Built **AI-assisted grading workflows** with multimodal models and OCR, reducing feedback turnaround by **60%** while supporting production operations through fault-aware batch execution, cost tracking, and CI/CD-backed releases.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **API and ETL microservices** using AWS Glue and S3, improving response time by **30%** while supporting distributed integrations, resilient data movement, and stable delivery across production partner workflows.
- Maintained **20+ automated test suites** with Jenkins, PyTest, and Mockito, increasing CI reliability by **68%**, reducing regressions, and improving confidence in frequent releases across coordinated service components.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed **MERN and WebSocket modules** for 2M+ synchronized records across eight workflows, improving throughput consistency, reducing stale-session behavior, and strengthening real-time responsiveness for high-volume user-facing processes.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%**, improving deployment consistency, and reducing environment drift that previously slowed validation, troubleshooting, and handoffs.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built **Flask booking and payment APIs** for a cross-platform services product, supporting 50K+ booking records while maintaining sub-200ms core flows, real-time synchronization, and consistent booking-state updates.
- Integrated **payment and refund workflows** with webhook automation, reducing manual handling by **70%** while improving transaction visibility, coupon validation, and operational reliability across customer-facing booking experiences.

Skills

Languages: TypeScript, JavaScript, Python, SQL, Java, C++, Bash
Frontend: React, Next.js, responsive interfaces, user-facing product implementation
Backend & APIs: Flask, FastAPI, Node.js, REST APIs, async workflows, payment integrations, ETL pipelines
Databases: PostgreSQL, MySQL, MongoDB, SQL Server, Firebase
Cloud & Infrastructure: AWS, Azure, Docker, Kubernetes, Jenkins, CI/CD
Engineering Practices: automated testing, Agile/Scrum, technical documentation, cross-functional collaboration

Projects

FinNexus Live | *Next.js, TypeScript, MongoDB, Plaid*

- Built a **fintech platform** with **Next.js** and **TypeScript**, supporting secure bank linking, real-time transaction visibility, and advanced filtering across 1M+ transactions for 50,000+ users reliably.

PiXMod Live | *Next.js, MongoDB, Stripe, Transformers*

- Built an **AI-powered Next.js SaaS platform** for image editing and search, integrating Stripe billing and MongoDB-backed workflows while increasing premium conversion by **18%** through polished product experiences.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Built an **AI-powered SQL workspace** supporting 10+ databases, accelerating query authoring and schema exploration through a unified **Java** and **TypeScript** codebase with Docker-backed local workflows.
