Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack software engineer pursuing an MSCS at USC with 2+ years building **customer-facing web/mobile features**, **REST APIs**, and AWS-backed data workflows, with hands-on experience shipping responsive interfaces, testing, and production reliability.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Web Technologies, Database Systems, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **Python-first platform services** for 500+ users, reducing request latency from **1.2s to 350ms** by optimizing execution paths, tuning SQL access patterns, and improving responsiveness for user-facing analytics workflows.
- Implemented **automated validation and ETL checks** for 5,000+ monthly jobs, reducing downstream failures while improving monitoring, release confidence, and reliability across recurring production data-processing workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **responsive full-stack features and APIs** handling 10,000+ daily requests, translating product requirements into maintainable backend services and polished interfaces while improving delivery predictability and implementation ownership.
- Built **AI-assisted grading workflows** with multimodal models and OCR, reducing feedback turnaround by **60%** while supporting production operations through concurrent execution, CI/CD-backed releases, and cost-aware debugging.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **API and ETL microservices** using AWS Glue and S3, improving response time by **30%** while supporting distributed integrations, resilient data movement, and stable delivery across production workloads.
- Maintained **20+ automated test suites** using Jenkins, PyTest, and Mockito, increasing CI reliability by **68%**, reducing regressions, and improving confidence in frequent releases across coordinated service components.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed **MERN and WebSocket modules** for 2M+ synchronized records across eight workflows, improving throughput consistency, reducing stale-session behavior, and strengthening real-time responsiveness for high-volume user-facing processes.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%**, improving deployment consistency, and reducing environment drift that previously slowed validation and troubleshooting.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built **Flask booking and payment APIs** for a cross-platform services product with React and **React Native** clients, supporting 50K+ booking records while maintaining sub-200ms core flows.
- Integrated **payment, coupon, and webhook workflows** with Firebase-backed synchronization, reducing manual handling by **70%** while improving operational reliability across customer-facing booking experiences.

Skills

Languages: JavaScript/TypeScript, Python, Java, SQL, C++, Bash
Frontend: React, React Native, Next.js, responsive UI development, component-driven interfaces
Backend & APIs: Flask, FastAPI, Node.js, REST APIs, ETL pipelines, async workflows
Data & Cloud: PostgreSQL, MySQL, MongoDB, Firebase, AWS, Docker, Kubernetes
Testing & Delivery: automated testing, Jenkins, CI/CD, debugging, feature-minded rollout discipline
Engineering: Agile/Scrum, cross-functional collaboration, customer-facing product development

Projects

FinNexus Live | *Next.js, TypeScript, MongoDB, Plaid*

- Built a **responsive financial platform** supporting secure account linking, real-time transaction visibility, and advanced filtering across 1M+ transactions for 50,000+ users through scalable TypeScript-backed workflows.

HMIS Live | *MERN, TypeScript, Twilio, Appwrite*

- Built a **customer-facing scheduling platform** with appointment workflows, notifications, and dashboard experiences, reducing administrative workload by **30%** through secure TypeScript-backed automation and responsive interfaces.

Linguistix Code | *Python, AWS, Docker, CI/CD*

- Built a **containerized REST processing API** on AWS CodePipeline and ECS/Fargate with automated validation gates, improving reliability, reducing deployment variance, and streamlining troubleshooting across production workflows.
