Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Web developer with 2+ years building dynamic healthcare and customer-facing applications, REST APIs, and database-backed workflows using JavaScript, TypeScript, React, Node.js, Python, HTML, CSS, JSON, SQL Server, and MySQL.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Algorithms, Databases, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, OOP

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – June 2026*
- Built responsive application workflows and Azure SQL-backed services for 500+ users, translating requirements into maintainable pages, APIs, and indexed queries that reduced dashboard latency from 1.2 seconds to 350 milliseconds.
- Maintained background services for 1,000+ monthly jobs using validation, retries, and failure isolation, improving throughput 3x while documenting issues, troubleshooting production behavior, and supporting reliable customer workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed React interfaces and Flask REST APIs for secure uploads, analysis, and review, supporting 10,000+ daily requests through reusable components, JSON integrations, documented endpoints, and responsive customer-facing workflows.
- Implemented multithreaded processing and MySQL on AWS RDS for 1,000+ files per batch, reducing turnaround by 60% while improving testing, debugging, and technical support across concurrent production workloads.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Maintained cross-platform web services and 20+ automated unit and integration suites using Jenkins, PyTest, and Mockito, improving release reliability, regression detection, and troubleshooting speed across changing customer requirements.
- Optimized REST API and ETL integrations with OOP patterns, AWS Glue, S3, and SQL processing, improving response times by 30% and pipeline efficiency by 68% for production applications.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built responsive MERN pages with JavaScript, HTML, CSS, REST APIs, WebSockets, and modular Node.js services, supporting 2M+ synchronized records while translating wireframes and requirements into functional workflows.
- Automated Docker-based CI/CD testing and deployments with Jenkins, cutting release time by 50% while improving build consistency, regression coverage, and troubleshooting for frequent content and application updates.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built Flask APIs for a customer booking application covering reservations, scheduling, payment status, and user workflows across 50,000+ records, enabling reliable page functionality and cleaner relational data handling.
- Integrated Firebase synchronization, JSON webhooks, and automated payment status handling, reducing manual processing by 70% while improving debugging visibility, operational consistency, and support for daily customer issues.

Skills

Languages: PHP, JavaScript, TypeScript, HTML5, CSS3, Python, Java, SQL, C++, Bash; **Frontend**: React.js, Next.js, Tailwind CSS, responsive design, web layout, wireframes, DOM, jQuery; **Backend**: Node.js, Express.js, Flask, FastAPI, REST APIs, JSON, WebSockets
Databases: SQL Server, MySQL, PostgreSQL, Azure SQL, MongoDB, Firebase, AWS RDS; **Engineering**: Git, Docker, Jenkins, CI/CD, unit testing, integration testing, debugging, technical support, documentation, API integration, OOP, Agile/Scrum

Projects

HMIS Live | *MERN, TypeScript, REST APIs, Sentry, Twilio*
- Built a responsive clinical workflow platform with secure APIs, patient scheduling, Twilio alerts, and Sentry monitoring, supporting 100+ daily appointments while reducing healthcare administrative workload by 30%.

PiXMod Live | *Next.js, TypeScript, React, MongoDB, Stripe*
- Built a responsive web application with reusable React components, authenticated user pages, credit-based usage, and Stripe subscriptions, delivering polished layouts and reliable customer workflows across desktop and mobile.

Chat2SQL Code | *Java, TypeScript, SQL Server, MySQL, Docker*
- Built a database management workspace supporting 10+ relational and NoSQL systems, accelerating query authoring, schema exploration, and data maintenance through integrated Java services and a TypeScript web interface.
