Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Solutions engineer with 2+ years building AI SaaS products, Python automation, SQL workflows, integrations, and customer applications while translating requirements, troubleshooting deployments, analyzing data, and communicating solutions.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Algorithms, Databases, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, OOP

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – June 2026*
- Architected Azure SQL and Blob-backed SaaS workflows for 500+ users, translating stakeholder needs into indexed queries, dashboards, and integrations that reduced reporting latency from 1.2 seconds to 350 milliseconds.
- Built fault-tolerant Python services for 1,000+ monthly jobs using validation, retries, and failure isolation, improving throughput 3x while documenting issues and communicating reliable resolutions to cross-functional stakeholders.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Delivered Flask APIs and React workflows for onboarding, secure uploads, automated analysis, and instructor review, supporting 10,000+ daily requests through documented integrations and responsive customer-facing product experiences.
- Implemented Python multithreading and MySQL on AWS RDS for 1,000+ files per batch, reducing turnaround by 60% while diagnosing technical issues and improving reliability across concurrent production workflows.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Developed Python microservices and 20+ automated test suites using Jenkins, PyTest, and Mockito, improving release reliability, deployment confidence, and troubleshooting speed while supporting client integrations across multiple environments.
- Optimized REST API and ETL automations with OOP patterns, AWS Glue, S3, and SQL processing, improving response times by 30% and workflow efficiency by 68% for customer deployments.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a B2B MERN platform with REST APIs, WebSockets, and modular Node.js services, supporting 2M+ synchronized records while tailoring workflows and real-time integrations for distributed operational users.
- Automated Docker-based CI/CD testing and deployments with Jenkins, cutting release time by 50% while improving implementation consistency, technical documentation, and issue resolution for frequent customer-facing updates.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Gathered requirements and built Flask APIs for booking, scheduling, payment status, and user workflows across 50,000+ records, translating business needs into reliable integrations and demonstrable customer solutions.
- Integrated Firebase synchronization, JSON webhooks, and automated payment workflows, reducing manual processing by 70% while improving troubleshooting visibility, implementation consistency, and customer communication around daily operational issues.

Skills

Solutions: Python scripting, workflow automation, discovery, requirements gathering, onboarding, product demonstrations, proof of concept, technical support, stakeholder communication; **Data**: SQL, PostgreSQL, MySQL, Azure SQL, MongoDB, Tableau, analysis, visualization

Applications & Delivery: Flask, FastAPI, REST APIs, JSON, React.js, Node.js, JavaScript, TypeScript, AWS, Azure, S3, Docker, Jenkins, Git, CI/CD, PyTest, Agile/Scrum, debugging, documentation, customer feedback, B2B SaaS

Projects

CPU-Scheduling Simulator Live | *C++, React, JavaScript*
- Implemented six scheduling algorithms with dynamic metrics and Gantt visualization, enabling users to compare performance across 1,000+ simulated processes and analyze resource trade-offs under varied project workloads.

Big-Brain Live | *Python, PostgreSQL, REST APIs, FAISS, LLaMA-2*
- Built an AI-powered SaaS platform for 200+ users with authenticated uploads, semantic search, summarization, and collaborative workflows, maintaining 95% query accuracy while reducing document-analysis time by 60%.

FinNexus Live | *Next.js, TypeScript, MongoDB, WebSockets, Kubernetes*
- Built a scalable customer platform for 50,000+ users and 1M+ transactions, combining secure integrations, real-time dashboards, data filtering, and Kubernetes-backed deployments for reliable high-volume operational workflows.
