Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years building secure cloud SaaS products, REST APIs, and AI-assisted workflows. Strong in Python, JavaScript/TypeScript, React, Azure/AWS, SQL, OOP, automated testing, CI/CD, and production reliability.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Algorithms, Databases, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, OOP

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – June 2026*
- Architected secure Azure SQL and Blob-backed SaaS services for 500+ users, optimizing indexed queries, schemas, and access controls to reduce dashboard latency from 1.2 seconds to 350 milliseconds.
- Built fault-tolerant AI workflows for 1,000+ monthly jobs using explicit states, retries, validation, and failure isolation, improving throughput 3x while strengthening testing, debugging, and recurring production reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Delivered React features and Flask REST APIs for secure document ingestion, automated analysis, and instructor review, supporting 10,000+ daily requests through reusable components, documented services, and reliable full-stack workflows.
- Implemented multithreaded processing and AWS RDS persistence for 1,000+ uploaded files per batch, reducing turnaround by 60% while improving testability, operational stability, and troubleshooting across concurrent production workloads.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Developed cross-platform microservices and 20+ unit and integration suites using Jenkins, PyTest, and Mockito, improving peer-review confidence, release reliability, and debugging speed across Windows, Linux, and macOS.
- Optimized REST API and ETL workflows with OOP patterns, AWS Glue, S3, and SQL processing, improving response times by 30% and pipeline efficiency by 68% for secure production services.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a responsive MERN SaaS platform with REST APIs, WebSockets, and modular Node.js services, supporting 2M+ synchronized records while improving real-time collaboration and customer-facing workflows across distributed users.
- Automated Docker-based CI/CD testing and deployments with Jenkins, cutting release time by 50% while improving build consistency, regression coverage, and troubleshooting for frequent application changes and production rollouts.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built Flask APIs for a customer-facing booking application covering reservations, scheduling, payment status, and user workflows across 50,000+ records, enabling reliable feature delivery and cleaner downstream data handling.
- Integrated Firebase synchronization, webhook-based payments, and automated status handling, reducing manual processing by 70% while improving debugging visibility, operational consistency, and stakeholder confidence in daily transaction workflows.

Skills

Languages: Python, JavaScript, TypeScript, Java, SQL, C++, Bash; **Frontend**: React.js, Next.js, HTML5, CSS3, Tailwind CSS, responsive design; **Backend & APIs**: Flask, FastAPI, Node.js, Express.js, REST APIs, WebSockets, microservices, OOP
Data & Cloud: Azure SQL, SQL Server, PostgreSQL, MySQL, MongoDB, Firebase, AWS RDS, AWS Glue, S3, Azure Blob Storage; **Engineering**: Git, Docker, Jenkins, GitHub Actions, CI/CD, PyTest, Mockito, unit testing, integration testing, peer reviews, debugging, documentation, Agile/Scrum, observability, secure development

Projects

Big-Brain Live | *Python, PostgreSQL, REST APIs, LLaMA-2, FAISS*
- Built a secure AI document platform for 200+ users with authenticated uploads, semantic search, summarization, and collaborative workflows, maintaining 95% query accuracy while reducing document-review time by 60%.

HMIS Live | *MERN, TypeScript, REST APIs, Sentry, Twilio*
- Built a monitored healthcare SaaS platform with secure consent-based APIs, responsive scheduling, Twilio alerts, and Sentry observability, supporting 100+ daily appointments while reducing administrative workload by 30%.

PiXMod Live | *Next.js, TypeScript, React, MongoDB, Stripe*
- Built a responsive AI SaaS product with reusable React components, authenticated user workflows, credit-based usage, and Stripe subscriptions, delivering a polished customer experience across desktop and mobile interfaces.
