Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years delivering **enterprise web applications**, **API-integrated backend services**, and **database-driven automation** using OOP, Python/Java, SQL, and Agile development practices.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **LA, California**
Software Engineer *September 2025 - Present*
- Developed **database-backed application components** for 500+ users with **Azure SQL/PostgreSQL**, reducing latency from **1.2s to 350ms** through schema optimization and query tuning.
- Built **validation and release workflows** for 5K+ monthly jobs, improving data integrity, error detection, and maintainability for internal and external user-facing business processes.

Grad8 **LA, California**
Software Engineer Intern *June 2025 - August 2025*
- Built **web application features** using Flask + React serving 10K+ daily requests, converting requirements into modular APIs, secure ingestion flows, and maintainable service design.
- Implemented **CI/CD controls** and concurrent processing checks, reducing turnaround time by **60%** while preserving code quality and reliability under production-scale usage conditions.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 - July 2024*
- Engineered **API and ETL integrations** with OOP, AWS Glue, and S3, improving response times by **30%** and strengthening client/server workflow consistency across enterprise systems.
- Maintained **20+ unit/integration suites** using Jenkins, PyTest, and Mockito across three OS environments, boosting pipeline efficiency by **68%** and reducing technical debt by **20%**.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 - August 2023*
- Built **REST API and WebSocket modules** supporting eight workflows and 2M+ synchronized records, improving operational reliability and application maintainability for internal and client-facing tools.
- Automated deployments/testing with **Jenkins** and **Docker**, reducing deployment time by **50%** and improving release consistency for iterative enhancements and defect fixes.

LST Capitals **India**
Web Developer Intern *November 2022 - January 2023*
- Developed **backend workflow integrations** using Flask APIs and Firebase for 50K+ records, enabling secure external user interactions with transaction and booking systems.
- Implemented **webhook-based automation** and technical documentation, improving traceability, support handoff quality, and team collaboration during rapid requirement and process updates.

Skills

Languages: **Python**, Java, SQL, JavaScript/TypeScript, C++
Enterprise Development: OOP, clean code, secure web application patterns, client/server architecture basics
Backend & APIs: Flask, FastAPI, Node.js, REST APIs, API integration, workflow automation
Data & Persistence: PostgreSQL, MySQL, SQL Server concepts, MongoDB, ETL workflows, ADO/ORM-adjacent patterns
Delivery Tooling: Git, GitHub, Azure DevOps/TFS familiarity, Jenkins, Docker, unit/integration testing, Agile/Scrum

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Maven, Docker*
- Built an **enterprise-style SQL application** across 10+ databases with schema-aware query generation and execution validation, improving reliability of backend data workflows and user productivity.

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Developed **client-facing workflow modules** for 50K+ users and 1M+ transactions with secure integrations, real-time updates, and deployment practices designed for maintainable feature evolution.

HMIS Live | *MERN, ABDM APIs, Twilio*
- Designed **API-driven operational workflows** supporting 100+ daily appointments, adding monitoring-backed checks that improved record retrieval by **2x** and reduced support burden in production.
