# Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

## Summary

Software Engineer with 2+ years delivering **customer-facing full-stack solutions**, **AI-enabled workflows**, and **API integrations** using React/TypeScript, Python, and Node-style services in high-urgency startup environments.

## Education

**University of Southern California, Los Angeles, CA** **August 2024 – May 2026**
*Master of Science in Computer Science* *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies

**Pandit Deendayal Energy University, Gandhinagar, India** **November 2020 – May 2024**
*Bachelor of Technology in Computer Science and Engineering* *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

## Experience

**USC Dornsife** **LA, California**
*Software Engineer* *September 2025 - Present*
- Owned **customer-impacting AI workflows** for 500+ users, reducing dashboard latency from **1.2s to 350ms** through schema optimization, responsive frontend updates, and API-path performance tuning.
- Built **FastAPI orchestration** for 5K+ monthly jobs with reconciliation safeguards, improving production reliability and enabling faster onboarding of new workflow variants based on stakeholder feedback.

**Grad8** **LA, California**
*Software Engineer Intern* *June 2025 - August 2025*
- Delivered **full-stack features** in **React + Flask** handling 10K+ daily requests, translating rough product direction into shippable MVPs, then iterating quickly from real user feedback.
- Improved **release speed and quality** using CI/CD controls and concurrent processing, reducing turnaround time by **60%** while maintaining stable behavior under tight customer-driven deadlines.

**Aasma Technology Solutions** **India**
*Software Developer Engineer - (SecureSync)* *August 2023 - July 2024*
- Built **API and ETL integrations** with OOP, AWS Glue, and S3, improving response times by **30%** and supporting autonomous-style data workflows across third-party enterprise systems.
- Maintained **20+ unit/integration suites** with Jenkins, PyTest, and Mockito across three OS environments, boosting pipeline efficiency by **68%** and reducing technical debt by **20%**.

**Aasma Technology Solutions** **India**
*Full Stack Developer Intern - (VibrantChem)* *May 2023 - August 2023*
- Built **MERN applications** with REST APIs and WebSockets supporting eight workflows and 2M+ synchronized records, improving end-to-end execution reliability for operationally critical user journeys.
- Automated deployments/testing with **Jenkins** and **Docker**, reducing deployment time by **50%** and improving ownership over releases, rollback safety, and production issue response.

**USC AD Labs** **Los Angeles, CA**
*ML Research Assistant* *January 2025 - May 2025*
- Developed **Python experimentation pipelines** for 100K+ trajectory logs, enabling fast iteration on model behaviors and practical evaluation loops under changing requirements and ambiguous technical constraints.
- Documented validation outcomes and failure patterns, accelerating collaborative debugging and helping teams convert experimental outputs into robust, customer-usable product capabilities.

## Skills

**Languages**: **TypeScript**, **JavaScript**, **Python**, Java, SQL, C++
**Full Stack**: **React.js**, Next.js, Flask, FastAPI, Node.js, REST APIs, WebSockets
**AI/ML Applications**: LLM integration patterns, prompt iteration, inference workflow tuning, evaluation-oriented experimentation
**Integrations & Platform**: Third-party API integrations, PostgreSQL, MySQL, MongoDB, AWS (S3/Glue/RDS), Docker, Kubernetes
**Execution**: Git, CI/CD, unit/integration testing, Agile/Scrum, stakeholder communication, rapid MVP iteration

## Projects

**FinNexus** Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Shipped **production full-stack workflows** for 50K+ users and 1M+ transactions with real-time updates, secure integrations, and scalable deployment patterns built for fast iteration and reliability.

**Chat2SQL** Code | *Java, TypeScript, SQL, Maven, Docker*
- Built an **AI-assisted application** spanning 10+ databases with schema-aware query generation and structured summaries, enabling quick experimentation, customer-facing iterations, and reliable integration into workflow tools.

**HMIS** Live | *MERN, ABDM APIs, Twilio*
- Developed **API-driven operational workflows** supporting 100+ daily appointments, adding monitoring-backed checks that improved record retrieval by **2x** and strengthened real-time support for critical user operations.
