Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | sahaj-bhadja | sahajbhadja | sahaj-bhadja

Summary

Full-stack developer with 2+ years building **web applications**, **backend APIs**, and **SQL database systems**. Experienced with JavaScript, TypeScript, Java, OOP principles, and collaborative development workflows using Git.

Education

University of Southern California, Los Angeles, CA — **August 2024 – May 2026**
Master of Science in Computer Science — *GPA: 3.75/4.0*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Software Engineering

Pandit Deendayal Energy University, Gandhinagar, India — **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering — *GPA: 3.88/4.0*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Database Systems

Experience

Aasma Technology Solutions — **India**
Full Stack Developer Intern - (VibrantChem) — *May 2023 – August 2023*

- Developed **full-stack web applications** using JavaScript frameworks and SQL databases, implementing user interfaces, backend APIs, and database queries for 2M+ synchronized records.
- Collaborated with **senior developers on multi-step projects**, participating in code reviews, sharing knowledge with team members, and following defined development processes and standards.

Aasma Technology Solutions — **India**
Software Developer Engineer - (SecureSync) — *August 2023 – July 2024*

- Built **backend applications using OOP design patterns** (Singleton, Factory), implementing API integrations and data processing workflows while maintaining documentation and technical specifications.
- Maintained **20+ automated test suites** and participated in Git-based code reviews, ensuring code quality and coordinating work efforts with other developers on the team.

Grad8 — **Los Angeles, CA**
Software Engineer Intern — *June 2025 – August 2025*

- Developed **web application features** with JavaScript frontend and Python backend, analyzing business requirements and creating functional specifications for development.
- Tested **new features to ensure functionality**, monitoring application performance and responding to user feedback while maintaining up-to-date documentation.

USC Dornsife — **Los Angeles, CA**
Software Engineer — *September 2025 – Present*

- Built **backend systems with SQL database optimization**, reducing query latency by **70%** through indexing, query tuning, and efficient data access patterns for 500+ users.
- Developed **data processing applications** with validation, error handling, and monitoring, achieving 99%+ reliability while interfacing with internal stakeholders.

LST Capitals — **India**
Web Developer Intern — *November 2022 – January 2023*

- Built **web applications with HTML, CSS, and JavaScript** for cross-platform deployment, implementing responsive interfaces across web and mobile platforms.
- Developed **REST APIs and SQL database queries** for booking and payment workflows, testing functionality and creating prototypes before final implementation.

Skills

Languages: JavaScript, TypeScript, **Java**, Python, C++, SQL, HTML, CSS
Frontend: React, Angular basics, responsive web design, cross-browser compatibility
Backend: Node.js, REST APIs, OOP design patterns, MVC architecture
Databases: PostgreSQL, MySQL, MongoDB, SQL queries, database optimization
Tools: **Git**, GitHub, Docker, CI/CD, Visual Studio Code, Agile/Scrum

Projects

Chat2SQL Code | *Java, TypeScript, PostgreSQL, MySQL, SQL Server, Docker*

- Built a **Java and TypeScript application** supporting 10+ SQL databases including PostgreSQL, MySQL, and SQL Server, implementing OOP patterns for schema exploration and query management.

CPU Scheduling Simulator Live | *C++, JavaScript, React*

- Built a **systems application in C++** implementing scheduling algorithms (FCFS, SJF, Round Robin), demonstrating OOP fundamentals and algorithm design with JavaScript visualization frontend.

FinNexus Live | *TypeScript, JavaScript, MongoDB, REST APIs*

- Built a **full-stack web application** with TypeScript and JavaScript, implementing database operations, API integrations, and responsive UI for 50K+ users.
