Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack engineer with 2+ years building **agentic AI systems**, **production-grade applications**, and **healthcare software**. Experienced shipping LLM-powered features in high-growth startup environments with rapid iteration and direct engagement with domain experts.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Built **agentic AI workflows using GPT-4o, Claude, and vision models** with switchable architecture, processing 10K+ daily requests with automated decision-making and reducing feedback turnaround by **60%**.
- Shipped **production features rapidly** in a fast-moving startup, working directly with 150+ domain experts (instructors) to gather feedback and iterate quickly on AI-powered solutions that addressed real-world needs.

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **scalable platform services** for 500+ users with fault-tolerant async orchestration, processing 1K+ AI jobs while reducing API latency from **1.2s to 350ms** through systematic optimization.
- Developed **production data pipelines** with validation, error handling, and monitoring, achieving 99%+ reliability while maintaining security and compliance standards across deployments.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **full-stack platform from zero-to-one** with 8 microservices for authentication, user management, and real-time notifications, handling 2M+ records with rapid feature iteration.
- Shipped features with **high autonomy and velocity**, cutting release cycles by **50%** through Docker-based CI/CD and wearing multiple hats across design, development, and deployment.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Developed **cross-platform applications with security-first design**, implementing automated testing and validation workflows while collaborating with stakeholders in Agile sprints.
- Built **API integrations and data pipelines** using AWS, improving response times by **30%** while maintaining robust error handling and audit-ready documentation.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built **end-to-end booking platform** with Flask APIs and Firebase, implementing secure payment flows, webhook handling, and real-time sync across 50K+ user transactions.
- Designed **system architecture from scratch**, presenting solutions directly to stakeholders and translating requirements into shipped features across web and mobile platforms.

Skills

AI/Agentic: GPT-4/Claude APIs, LLM orchestration, agentic workflows, multimodal AI, prompt engineering
Backend: Python, FastAPI, Flask, Node.js, REST APIs, async services, microservices
Frontend: React, TypeScript, Next.js, responsive UI, real-time interfaces
Data & Infra: PostgreSQL, MongoDB, AWS, Docker, CI/CD, production monitoring
Practices: Rapid iteration, Agile, security-minded development, HIPAA-awareness, startup velocity

Projects

HMIS - Healthcare Management System Live | *MERN, TypeScript, ABDM APIs, Twilio*

- Built a **healthcare platform** with consent-based patient data access using India's ABDM APIs, enabling doctors to access patient histories 2x faster and manage 100+ daily appointments with role-based access control.

Big-Brain Live | *LLaMA-2, FAISS, Pinecone, PostgreSQL*

- Built an **agentic document intelligence platform** with natural language Q&A across 50K+ documents, achieving 95% query accuracy through vector embeddings and LLM-powered retrieval-augmented generation.

PiXMod Live | *Next.js, MongoDB, Transformers, Stripe*

- Built an **AI-powered SaaS platform** using CLIP and Stable Diffusion, implementing autonomous image processing workflows with semantic search across 100K+ embeddings.
