Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | sahaj-bhadja | sahajbhadja | sahaj-bhadja

Summary

Full-stack engineer with 2+ years building **React/TypeScript interfaces**, **REST APIs**, and **AI-powered features** using modern web frameworks. Experienced with CI/CD pipelines, Docker, AWS deployments, and collaborative development workflows.

Education

University of Southern California, Los Angeles, CA — **August 2024 – May 2026**
Master of Science in Computer Science — *GPA: 3.75/4.0*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India — **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering — *GPA: 3.88/4.0*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

Grad8 — **Los Angeles, CA**
Software Engineer Intern — *June 2025 – August 2025*

- Built **AI-powered editorial features** integrating GPT-4o and Claude APIs into production workflows, implementing content automation tools that reduced feedback turnaround by **60%** for 150+ instructors.
- Developed **full-stack features using React and Flask** with MVC architecture, building responsive UI components and REST APIs handling 10K+ daily requests with stable performance under load.

USC Dornsife — **Los Angeles, CA**
Software Engineer — *September 2025 – Present*

- Built **backend APIs with Python** serving 500+ users, reducing latency from **1.2s to 350ms** through query optimization, database indexing, and efficient data access patterns across relational databases.
- Developed **data integration pipelines** processing 5K+ monthly jobs with validation, error handling, and CI/CD-backed releases, achieving 99%+ reliability in production environments.

Aasma Technology Solutions — **India**
Full Stack Developer Intern - (VibrantChem) — *May 2023 – August 2023*

- Developed **full-stack web application using MERN stack** with 8 microservices for authentication, user management, and notifications, handling 2M+ records with WebSocket-powered real-time updates.
- Automated **CI/CD pipelines with Docker and Jenkins**, implementing staged deployments to Azure, cutting release cycles by **50%** and achieving 95%+ build validation across environments.

Aasma Technology Solutions — **India**
Software Developer Engineer - (SecureSync) — *August 2023 – July 2024*

- Maintained **20+ automated test suites** using PyTest and Mockito, implementing unit and integration tests across API endpoints, increasing CI reliability by **68%** through systematic test coverage.
- Built **CI/CD workflows with Jenkins and GitHub Actions** for cross-platform deployments, automating build validation, test execution, and production releases with documented runbooks.

LST Capitals — **India**
Web Developer Intern — *November 2022 – January 2023*

- Built **REST APIs with Flask** for cross-platform booking application, implementing secure payment webhooks, input validation, and CORS configuration with sub-200ms response times.
- Developed **React Native and React web interfaces** with Firebase real-time sync, supporting 50K+ booking records across iOS, Android, and web platforms with consistent UX.

Skills

Frontend: **React**, **TypeScript**, Next.js, JavaScript, HTML/CSS, responsive design, accessibility basics
Backend: Python, Flask, Node.js, Express, REST APIs, MVC patterns, relational databases
Databases: PostgreSQL, MySQL, MongoDB, SQL queries, database optimization
AI Tools: GPT-4/Claude API integration, AI-assisted development, LLM-powered features
DevOps: Docker, AWS, Jenkins, GitHub Actions, CI/CD pipelines, Git workflows

Projects

PiXMod Live | *Next.js, TypeScript, MongoDB, Stripe, Transformers*

- Built a **Next.js SaaS platform** with AI-powered image features, implementing Stripe billing, user authentication, and responsive UI with MongoDB-backed content management.

FinNexus Live | *Next.js, TypeScript, MongoDB, Plaid, TailwindCSS*

- Built a **responsive fintech web application** with Next.js and TypeScript, implementing real-time data sync, secure API integrations, and accessible UI components for 50K+ users.

HMIS Live | *MERN, TypeScript, ABDM APIs, Twilio, Sentry*

- Built a **healthcare web platform** with React and Node.js, implementing appointment workflows, SMS notifications via Twilio, and error monitoring with Sentry for production reliability.
