Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack engineer with 2+ years building **AI-powered applications**, **REST APIs**, and **consumer-facing products**. Experience shipping end-to-end features with React, Next.js, Node.js, and Python in fast-paced startup environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Web Technologies, Database Systems, Machine Learning, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Object-Oriented Programming, Data Structures, Algorithms

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **full-stack features across frontend and backend systems** using React and FastAPI, implementing APIs and data flows that reduced dashboard latency from **1.2s to 350ms** for 500+ users.
- Developed **data processing and analytics pipelines** handling 5K+ monthly jobs with SQL optimization, collaborating with product teams to ship end-to-end features with 99%+ reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Built and shipped **AI-powered features integrating LLMs** (GPT-4o, Claude) into production, implementing APIs that handled 10K+ daily requests while collaborating with designers and product managers.
- Implemented **React frontend and Flask backend features** for content workflows, contributing to code quality, testing, and documentation in a fast-paced, high-ownership environment.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Built **ML pipelines and data workflows** using PyTorch, implementing end-to-end features that improved model performance by 18% through systematic experimentation and analysis.
- Collaborated with **cross-functional teams** to design and ship features, learning and applying best practices for scalable, maintainable software in research-to-production workflows.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Implemented **APIs and data flows supporting product workflows**, improving response times by 30% and pipeline efficiency by **68%** while debugging and improving system reliability.
- Contributed to **code quality, testing, and documentation** using Jenkins CI/CD and pytest, collaborating in Agile sprints with a focus on shipping features at startup velocity.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **MERN-based platform with React frontend and Node.js backend**, implementing REST APIs and real-time WebSocket features for a CRM handling 2M+ product records across locations.
- Shipped **end-to-end features for content and analytics workflows**, including lead management, billing, and customer data dashboards with MongoDB and Azure SQL databases.

Skills

Frontend: React, Next.js, TypeScript, JavaScript, TailwindCSS, HTML/CSS
Backend: Node.js, Express, Flask, FastAPI, Python, REST APIs
Databases: PostgreSQL, MongoDB, MySQL, Redis, SQL optimization
Tools: Git, GitHub, Docker, AWS, Vercel, CI/CD, Agile/Scrum, testing

Projects

PiXMod Live | *Next.js, MongoDB, Stripe, AI APIs, TailwindCSS*

- Built an **AI-powered SaaS platform** with Next.js frontend, implementing subscription billing with Stripe and shipping features for image processing and semantic search across 100K+ assets.

FinNexus Live | *Next.js, TypeScript, Plaid, MongoDB, WebSockets*

- Built a **consumer fintech platform** supporting 50K+ users and 1M+ transactions, implementing real-time data flows with Plaid API integration and responsive Next.js frontend.

Big-Brain Live | *LLaMA-2, FAISS, Pinecone, PostgreSQL, GCP*

- Built an **AI-powered discovery platform** with semantic search across 50K+ documents, implementing vector embeddings and retrieval pipelines achieving 95% query accuracy.
