Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Cloud engineer with 2+ years experience in **cloud infrastructure deployment and operations** using GCP and AWS. Proficient in Python scripting, CI/CD pipelines (GitHub Actions, Jenkins), Docker containerization, and Linux systems administration.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Cloud Computing, Database Systems, Distributed Systems, Computer Networks

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Operating Systems (Linux), Computer Networks, Software Engineering

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Provisioned and managed **cloud infrastructure resources** for production applications, monitoring systems using logging and alerting tools to ensure performance, reliability, and 99%+ uptime.
- Collaborated with **DevOps and development teams** on deployments and automation initiatives, maintaining documentation of cloud architecture and configurations for operational excellence.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Supported deployment and maintenance of **cloud-hosted applications** handling 10K+ daily requests, troubleshooting infrastructure and application-related issues to improve system availability.
- Assisted with **CI/CD pipeline implementation** using GitHub Actions, collaborating with cross-functional teams on operational improvements and continuous deployment workflows.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Deployed and optimized applications within **GCP environments**, configuring compute resources and cloud storage to support ML workloads with improved processing efficiency by 18%.
- Developed **Python automation scripts** for data processing pipelines, partnering with cross-functional teams to support cloud operations and continuous improvement initiatives.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Provisioned and configured **AWS cloud resources** including EC2, S3, and Lambda, implementing Infrastructure as Code practices to improve deployment efficiency by **68%**.
- Supported and maintained **CI/CD pipelines using Jenkins**, managing IAM roles and access controls while securing cloud infrastructure following security best practices.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Deployed containerized applications using **Docker**, configuring cloud environments and troubleshooting deployment issues across development and production systems.
- Maintained documentation of **configurations and operational processes**, collaborating with teams using Git version control to support cloud operations and deployments.

Skills

Cloud Platforms: GCP (Compute Engine, Cloud Storage, Cloud Run), AWS (EC2, S3, Lambda, ECS)
DevOps & CI/CD: GitHub Actions, Jenkins, Docker, Terraform basics, automated deployments
Scripting & Tools: Python, Bash, Git, Linux command-line, monitoring and logging
Networking & Security: VPCs, DNS basics, IAM roles, service accounts, access controls

Projects

Linguistix Code | *AWS (ECS, Fargate, CodePipeline), Docker, CI/CD*

- Deployed **containerized application on AWS** using ECS and Fargate, implementing CI/CD pipelines with CodePipeline for automated deployments and configuring cloud resources for scalable operations.

Big-Brain Live | *GCP, PostgreSQL, Python, Cloud Deployment*

- Provisioned and managed **GCP cloud infrastructure** for AI platform, configuring compute resources, cloud storage, and database services to support 50K+ document processing with high availability.

FinNexus Live | *Cloud Deployment, MongoDB, Vercel*

- Deployed and maintained **cloud-hosted financial platform** supporting 50K+ users, monitoring system performance and implementing secure configurations for reliable cloud operations.
