Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | sahaj-bhadja | sahajbhadja | sahaj-bhadja

Summary

Full-stack engineer with 2+ years building **scalable web applications**, **backend services**, and **third-party integrations**. Experience with React, Next.js, Python, and cloud platforms (AWS), with strong foundations in software development fundamentals and testing practices.

Education

University of Southern California, Los Angeles, CA — **August 2024 – May 2026**
Master of Science in Computer Science — *GPA: 3.75/4.0*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Data Structures

Pandit Deendayal Energy University, Gandhinagar, India — **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering — *GPA: 3.88/4.0*
Coursework: Software Engineering, Data Structures, Object-Oriented Programming, Algorithms

Experience

USC Dornsife — **Los Angeles, CA**
Software Engineer — *September 2025 – Present*
- Built and maintained **full-stack features across web applications and backend services** using React and FastAPI, collaborating with cross-functional partners to translate business requirements into technical solutions.
- Contributed to **scalable, reliable systems** processing 5K+ monthly jobs, writing high-quality code and participating in code reviews to uphold engineering standards with 99%+ production reliability.

Grad8 — **Los Angeles, CA**
Software Engineer Intern — *June 2025 – August 2025*
- Built and maintained **React frontend and Python backend features** for a production platform handling 10K+ daily requests, integrating with third-party APIs (OpenAI, Anthropic) and supporting ongoing system improvements.
- Wrote **high-quality, well-tested code** and participated in code reviews, debugging issues and troubleshooting production systems while identifying opportunities to improve processes and tooling.

USC AD Labs — **Los Angeles, CA**
ML Research Assistant — *January 2025 – May 2025*
- Built **data processing pipelines** using Python and PyTorch, contributing to systems that improved model performance by 18% while demonstrating ability to learn new technologies through feedback.
- Collaborated with **cross-functional partners** including researchers and engineers to design technical solutions, working effectively in a fast-paced, iterative environment.

Aasma Technology Solutions — **India**
Software Developer Engineer - (SecureSync) — *August 2023 – July 2024*
- Designed and implemented **scalable backend services and APIs** using Python and AWS, improving system efficiency by **68%** through reliable architecture and ongoing system improvements.
- Contributed to **code quality, testing practices, and CI/CD pipelines** using pytest and Jenkins, collaborating in Agile sprints to deliver features with testability and maintainability in mind.

Aasma Technology Solutions — **India**
Full Stack Developer Intern - (VibrantChem) — *May 2023 – August 2023*
- Developed **full-stack web applications with microservices architecture** using React, Node.js, and MongoDB, building features that supported workflows handling 2M+ records across SQL and NoSQL databases.
- Built **third-party integrations** and real-time WebSocket features, contributing across frontend and backend components with Docker deployment and automated testing.

Skills

Frontend: React, Next.js, JavaScript, TypeScript, HTML, CSS, TailwindCSS
Backend: Python, Node.js, Flask, FastAPI, Ruby basics, REST APIs, microservices
Databases: PostgreSQL, MySQL, MongoDB, SQL queries, data modeling
Cloud & Tools: AWS, GCP, Docker, Git, CI/CD, testing (pytest), Agile/Scrum

Projects

FinNexus Live | *Next.js, TypeScript, Plaid, MongoDB, WebSockets*
- Built a **scalable fintech platform** supporting 50K+ users and 1M+ transactions, implementing third-party bank integrations (Plaid API) with real-time data synchronization and secure transaction workflows.

Big-Brain Live | *LLaMA-2, FAISS, PostgreSQL, GCP*
- Built a **scalable AI platform** with backend services and third-party integrations, implementing reliable data processing workflows across 50K+ documents with 95% query accuracy.

Linguistix Code | *Python, AWS (ECS, Fargate, CodePipeline), Docker*
- Developed a **containerized application deployed on AWS** with automated CI/CD pipelines, implementing validation checks and achieving production-grade reliability through systematic testing.
