Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | sahaj-bhadja | sahajbhadja | sahaj-bhadja

Summary

Full-stack engineer with 2+ years building **interactive data-driven applications** using React, JavaScript, and backend services. Experience with **SQL databases**, REST APIs, and test-driven development, with strong foundations in software engineering best practices.

Education

University of Southern California, Los Angeles, CA — **August 2024 – May 2026**
Master of Science in Computer Science — *GPA: 3.75/4.0*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Data Structures

Pandit Deendayal Energy University, Gandhinagar, India — **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering — *GPA: 3.88/4.0*
Coursework: Software Engineering, Data Structures, Object-Oriented Programming (Java), Algorithms

Experience

USC Dornsife — **Los Angeles, CA**
Software Engineer — *September 2025 – Present*

- Built and maintained **full-stack features using React and REST APIs**, developing interactive data presentation components that process complex queries and deliver intuitive user experiences for 5K+ monthly users.
- Collaborated with cross-functional partners to translate business requirements into scalable backend services, writing **high-quality, testable code** with comprehensive unit tests and participating in code reviews.

Grad8 — **Los Angeles, CA**
Software Engineer Intern — *June 2025 – August 2025*

- Developed **React components and JavaScript frontend features** for production platform handling 10K+ daily requests, optimizing client-side rendering performance and implementing responsive data visualizations.
- Built and maintained **backend services with REST APIs**, actively participating in TDD practices and writing comprehensive unit/integration tests while debugging and troubleshooting production systems.

USC AD Labs — **Los Angeles, CA**
ML Research Assistant — *January 2025 – May 2025*

- Built **data processing and visualization pipelines** using Python, transforming complex datasets into structured formats for analysis while improving query performance by 18% through optimization.
- Collaborated in agile environment with researchers and engineers, demonstrating strong communication skills and ability to translate complex data requirements into technical solutions.

Aasma Technology Solutions — **India**
Software Developer Engineer - (SecureSync) — *August 2023 – July 2024*

- Designed and implemented **scalable REST APIs and backend services**, optimizing SQL database queries and improving system efficiency by **68%** through performance tuning and caching strategies.
- Championed **code quality through TDD practices**, writing comprehensive unit and integration tests with pytest and participating in constructive code reviews within Agile sprints.

Aasma Technology Solutions — **India**
Full Stack Developer Intern - (VibrantChem) — *May 2023 – August 2023*

- Developed **full-stack features using React, JavaScript, and Node.js**, building interactive data visualization components and maintaining backend services handling 2M+ records across SQL databases.
- Built RESTful APIs with proper HTML/CSS/DOM structure, implementing **real-time WebSocket features** and collaborating closely with UX designers to deliver user-friendly interfaces.

Skills

Frontend: React, JavaScript (ES6+), TypeScript, HTML, CSS, DOM manipulation, responsive design
Backend: Java, Python, Node.js, REST APIs, Spring basics, Flask, FastAPI
Databases: MySQL, PostgreSQL, SQL queries, MongoDB, data modeling, query optimization
Tools & Practices: Git, Docker, CI/CD, TDD, unit testing, Agile/Scrum, client-side debugging

Projects

Chat2SQL Code | *React, JavaScript, Python, MySQL, LLM Integration*

- Built an **interactive data query interface** enabling natural language to SQL conversion, developing React frontend with dynamic data visualization components and MySQL backend supporting complex reporting queries.

FinNexus Live | *React, Next.js, TypeScript, MongoDB, REST APIs*

- Developed a **full-stack financial platform** with React frontend and REST API backend, implementing real-time data synchronization, interactive dashboards, and secure transaction workflows for 50K+ users.

Big-Brain Live | *React, Python, PostgreSQL, GCP*

- Built a **scalable data platform** with interactive query interface, implementing efficient SQL database design and optimized backend services processing 50K+ documents with 95% query accuracy.
