Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | sahaj-bhadja | sahajbhadja | sahaj-bhadja

Summary

Full-stack developer with 2+ years building **data-driven applications**, **ETL pipelines**, and **scalable APIs**. Experience with React, Python, Node.js, SQL/NoSQL databases, and cloud platforms (AWS, Azure), with strong fundamentals in data structures and algorithms.

Education

University of Southern California, Los Angeles, CA — **August 2024 – May 2026**
Master of Science in Computer Science — *GPA: 3.75/4.0*
Coursework: Database Systems, Analysis of Algorithms, Web Technologies, Data Structures

Pandit Deendayal Energy University, Gandhinagar, India — **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering — *GPA: 3.88/4.0*
Coursework: Data Structures, Algorithms, Software Engineering, Object-Oriented Programming

Experience

USC Dornsife — **Los Angeles, CA**
Software Engineer — *September 2025 – Present*
- Built **full-stack data-driven applications** using React and FastAPI, integrating with enterprise data platforms and optimizing SQL queries to reduce dashboard latency from **1.2s to 350ms** for 500+ users.
- Developed **ETL-style data pipelines** processing 5K+ monthly jobs with incremental loads, data validation, and CI/CD-backed releases, achieving 99%+ reliability while collaborating with data engineers and architects.

Grad8 — **Los Angeles, CA**
Software Engineer Intern — *June 2025 – August 2025*
- Implemented **REST APIs and data flows** supporting content and analytics workflows, handling 10K+ daily requests while participating in design discussions, code reviews, and debugging.
- Built **React frontend and Python backend features**, ensuring code quality, testing, and adherence to modern engineering practices (CI/CD) in a fast-paced, collaborative environment.

USC AD Labs — **Los Angeles, CA**
ML Research Assistant — *January 2025 – May 2025*
- Built **data processing pipelines** using Python and PyTorch, implementing end-to-end workflows that processed 100K+ records with data modeling and feature engineering for ML applications.
- Collaborated with **data scientists and researchers** to design scalable solutions, demonstrating strong problem-solving skills and ability to work at the intersection of application development and data engineering.

Aasma Technology Solutions — **India**
Software Developer Engineer - (SecureSync) — *August 2023 – July 2024*
- Engineered **ETL workflows using AWS Glue and S3**, transforming raw data into normalized formats for downstream applications, improving pipeline efficiency by **68%** and reducing storage costs by 15%.
- Built **scalable REST APIs with microservices architecture**, implementing data validation and ensuring code quality with pytest and Jenkins CI/CD in Agile sprints.

Aasma Technology Solutions — **India**
Full Stack Developer Intern - (VibrantChem) — *May 2023 – August 2023*
- Developed **MERN-based application with React frontend and Node.js backend**, implementing REST APIs and real-time WebSocket features for a platform handling 2M+ records across SQL and NoSQL databases.
- Integrated applications with **enterprise data platforms** (Azure SQL, MongoDB), building analytics dashboards and data-driven features with Docker deployment and CI/CD automation.

Skills

Frontend: React, Next.js, Angular basics, JavaScript/TypeScript, HTML, CSS, TailwindCSS
Backend: Python, Node.js, Java, Flask, FastAPI, Express, REST APIs, microservices
Databases: PostgreSQL, MySQL, MongoDB, SQL optimization, data modeling, ETL pipelines
Cloud & Tools: AWS (S3, Glue, RDS), Azure, GCP, Docker, Git, CI/CD, Jenkins

Projects

Big-Brain Live | *LLaMA-2, PostgreSQL, FAISS, Pinecone, GCP*
- Built a **data-driven AI platform** with semantic retrieval across 50K+ documents, implementing data ingestion pipelines and SQL-backed storage achieving 95% query accuracy with sub-second latency.

Chat2SQL Code | *Java, TypeScript, Docker, PostgreSQL, MySQL, MongoDB*
- Built a **database management platform** supporting 10+ database systems, implementing schema-aware SQL generation with data workflows across SQL and NoSQL databases.

Linguistix Code | *Python, AWS (ECS, Fargate, CodePipeline), Docker*
- Developed a **containerized Python application on AWS** with automated CI/CD pipelines, implementing data validation and achieving production-grade reliability through systematic testing.
