Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | LinkedIn | GitHub | Portfolio

Summary

Software engineer with 2+ years building API-driven applications, responsive interfaces, real-time integrations, and reliable backend services. Experienced in Python, JavaScript, TypeScript, React, Node.js, REST APIs, WebSockets, testing, debugging, Git, CI/CD, and production support.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built Python APIs, Azure SQL services, and user-facing dashboards for 500+ users, profiling indexed queries and backend access paths to reduce production latency from 1.2 seconds to 350 milliseconds.
- Orchestrated 5,000+ monthly jobs through explicit states, retries, reconciliation, and failure isolation, tripling throughput while improving system observability, maintainability, operational support, and systematic production issue troubleshooting responsiveness.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed React interfaces and Flask REST services handling 10,000+ daily requests, integrating authentication, document workflows, structured status updates, and responsive controls while debugging production defects affecting 150+ users.
- Created multithreaded processing for 1,000+ files with validation, AWS RDS persistence, progress indicators, and failure recovery, reducing turnaround 60% while maintaining reliable behavior under concurrent production load.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Developed Python services and third-party REST integrations using filtering, pagination, caching, AWS Glue, S3, and SQL, improving response times 30% and data-processing efficiency 68% across production applications.
- Maintained 20+ automated unit and integration suites with Jenkins, PyTest, and Mockito, collaborating on test strategy while accelerating defect diagnosis and reliable releases across Windows, Linux, and macOS.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Developed modular React and Node.js features across eight microservices with authentication, role-based access, WebSocket messaging, and state synchronization, coordinating 2 million+ Azure SQL records through documented interfaces.
- Automated Docker builds, functional tests, staged deployments, and production monitoring through Jenkins and Azure, reducing release time 50% while improving code quality, deployment consistency, and operational visibility.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built responsive React Native interfaces for iOS and Android with Firebase persistence, real-time state synchronization, image storage, notifications, and secure sessions across a platform handling 50,000+ records.
- Developed Flask REST APIs for bookings, pricing, and payments, delivering sub-200-millisecond responses and reliable webhook-driven synchronization that improved confirmation speed 40% across customer-facing mobile application integration workflows.

Skills

Languages & UI: Python, JavaScript, TypeScript, Java, SQL, HTML5, CSS3, React, React Native, responsive interfaces, reusable components, UI/UX implementation
APIs & Integration: Node.js, Flask, FastAPI, REST APIs, HTTP, WebSockets, webhooks, JSON, microservices, third-party integrations, API automation, real-time synchronization
Cloud & Data: AWS, Azure, S3, AWS RDS, Azure SQL, PostgreSQL, MySQL, MongoDB, Firebase, Docker, Kubernetes, cloud services, data processing
Quality & Delivery: Git, Jenkins, CI/CD, PyTest, Mockito, unit testing, integration testing, functional testing, automated testing, test strategy, debugging, logging, monitoring, code review, documentation, build automation, production support, Agile

Projects

HMIS | Live | *TypeScript, React, REST APIs, Appwrite, Sentry, Twilio*
- Built responsive healthcare workflows for appointments, records, and consent-based access using React, REST APIs, authentication, notifications, and Sentry monitoring, supporting 100+ daily interactions while reducing administrative workload 30%.

Chat2SQL | Code | *Java, TypeScript, SQL, PostgreSQL, MySQL, MongoDB, Docker*
- Built an AI-powered SQL workspace supporting 10+ databases with schema-aware query generation, structured validation, optimized execution, metadata exploration, and Docker-backed deployment across modular Java and TypeScript services.

FinNexus | Live | *TypeScript, Next.js, REST APIs, WebSockets, MongoDB, Kubernetes*
- Built a responsive platform supporting 50,000+ users and one million transactions, integrating secure APIs, real-time WebSocket synchronization, MongoDB persistence, reusable interfaces, Kubernetes deployment, and automated release workflows.
