Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | LinkedIn | GitHub | Portfolio

Summary

Backend-focused software engineer with 2+ years building Azure-hosted applications, REST services, automation, and database-driven workflows. Experienced in Python, Java, AngularJS, React, SQL, JSON, NoSQL, debugging, performance tuning, testing, CI/CD, and production support.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built Python backend services on Azure SQL and Blob Storage for 500+ users, optimizing queries, data models, and application performance to reduce dashboard latency from 1.2 seconds to 350 milliseconds.
- Automated 5,000+ monthly operational jobs using explicit states, retries, reconciliation, and failure isolation, tripling throughput while improving platform stability, troubleshooting visibility, maintainability, and reliable production support.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed React interfaces and Flask REST services handling 10,000+ daily requests, implementing secure file ingestion, status workflows, and backend business logic while resolving production issues for 150+ users.
- Created automation for 1,000+ files with concurrent processing, AWS RDS persistence, JSON validation, and structured error handling, reducing manual turnaround 60% while maintaining reliable application behavior.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Developed backend services, SQL queries, REST integrations, and ETL automation using Python, AWS Glue, and S3, improving response times 30% and processing efficiency 68% across production applications.
- Maintained 20+ automated unit and integration suites with Jenkins, PyTest, and Mockito across three platforms, accelerating complex-issue debugging, performance validation, bug fixes, and confidence in production deployments.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Developed modular React and Node.js features across eight authentication, billing, permissions, and support workflows, synchronizing 2 million+ Azure SQL records through maintainable backend services and real-time WebSockets.
- Automated Docker builds, tests, staged deployments, and production monitoring through Jenkins and Azure, reducing release time 50% while improving platform stability, deployment consistency, and overall operational reliability.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built Flask backend APIs for reservation, status, and payment workflows across 50,000+ records, writing database queries and troubleshooting application issues while translating operational requirements into maintainable features.
- Automated Firebase and JSON transaction synchronization using webhooks, validation, and structured error handling, reducing manual payment processing 70% while improving operational efficiency, support visibility, and data reliability.

Skills

Languages & Frontend: Python, Java, TypeScript, JavaScript, SQL, AngularJS, React, Next.js, HTML5, CSS3, responsive UI, component design
Backend & Automation: REST APIs, JSON, Flask, FastAPI, Node.js, microservices, WebSockets, business logic, workflow automation, scripting, API integration, performance tuning
Databases & Azure: Azure, Azure SQL, SQL Server, PostgreSQL, MySQL, MongoDB, Firebase, AWS RDS, Blob Storage, NoSQL, data modeling, indexing, query optimization
Operations & Quality: Git, Docker, Kubernetes, Jenkins, CI/CD, PyTest, Mockito, unit testing, integration testing, debugging, troubleshooting, logging, monitoring, deployment, maintenance, production support, Agile

Projects

PiXMod | Live | *AngularJS, Next.js, TypeScript, MongoDB, Stripe*
- Developed AngularJS and Next.js interfaces with REST integrations, Stripe transactions, MongoDB JSON data, reusable components, and automated workflows, reliably processing 1,000+ user-edited assets across a full-stack application.

Chat2SQL | Code | *Java, TypeScript, SQL, PostgreSQL, MongoDB, Docker*
- Built a database application supporting 10+ relational and NoSQL systems, combining Java services, TypeScript interfaces, SQL queries, JSON data, Docker, debugging workflows, and reliable cross-platform deployment support.

FinNexus | Live | *TypeScript, React, REST APIs, WebSockets, MongoDB, Kubernetes*
- Built operational transaction workflows supporting 50,000+ users and one million records, integrating secure APIs, real-time synchronization, MongoDB JSON persistence, Kubernetes, monitoring workflows, and automated CI/CD deployment.
