Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | LinkedIn | GitHub | Portfolio

Summary

Software developer with 2+ years building database-driven applications, reporting tools, responsive interfaces, and financial workflows. Experienced in Python, Java, JavaScript, AngularJS, React, PostgreSQL, SQL, REST APIs, debugging, automated testing, deployment, and production maintenance.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built Python APIs, Azure SQL services, and customized reporting dashboards for 500+ users, translating financial requirements into database-driven interfaces while reducing query latency from 1.2 seconds to 350 milliseconds.
- Supported 5,000+ monthly production jobs using explicit states, retries, reconciliation, and failure isolation, tripling throughput while improving data integrity, networked-service observability, debugging, and reliable software maintenance.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed responsive React interfaces and Flask REST services for upload, routing, status, and reporting workflows, translating client requirements into maintainable application modules supporting 150+ users and 10,000+ daily requests.
- Created concurrent processing for 1,000+ files with automated validation, AWS RDS queries, and structured error handling, reducing turnaround 60% while supporting secure, scalable three-tier application behavior.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Developed REST services, SQL queries, and database integrations using Python, AWS Glue, and S3, improving response times 30% and processing efficiency 68% across secure client-facing financial applications.
- Maintained 20+ automated unit and integration suites with Jenkins, PyTest, and Mockito across Windows and Linux environments, accelerating source-level debugging, software upgrades, and confidence in production releases.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Developed modular React and Node.js user interfaces across eight customer, billing, permissions, and reporting workflows, synchronizing 2 million+ Azure SQL records through maintainable services and real-time WebSockets.
- Automated Docker builds, tests, staged deployments, and production monitoring through Jenkins and Azure, reducing release time 50% while improving module quality, application maintainability, and overall operational reliability.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built Flask APIs and responsive user interfaces for reservations, status updates, reporting, and payments across 50,000+ records, translating business requirements into secure, database-driven financial application modules.
- Implemented Firebase queries, webhooks, and payment synchronization with structured validation and error handling, reducing manual processing 70% while improving transaction visibility, customized reporting, reconciliation, and user experience.

Skills

Languages & UI: Python, Java, JavaScript, TypeScript, SQL, PHP, React, AngularJS, Next.js, HTML5, CSS3, responsive UI, data visualization
Applications & Networking: REST APIs, JSON, WebSockets, TCP/IP, three-tier architecture, client-server systems, microservices, database-driven applications, API integration, reporting tools, financial workflows
Databases & Cloud: PostgreSQL, Azure SQL, SQL Server, MySQL, MongoDB, Firebase, AWS RDS, AWS, Azure, Amazon S3, Blob Storage, RDBMS, data modeling, indexing, query optimization
Development & Quality: Linux, Bash, Git, Docker, Jenkins, CI/CD, PyTest, Mockito, unit testing, integration testing, source debugging, deployment, maintenance, production support, Agile, SDLC

Projects

FinNexus | Live | *TypeScript, React, REST APIs, WebSockets, MongoDB, Kubernetes*
- Built financial reporting and payment workflows supporting 50,000+ users and one million transactions, integrating secure APIs, real-time synchronization, customized filters, MongoDB persistence, Kubernetes, and automated CI/CD deployment.

Chat2SQL | Code | *Java, TypeScript, SQL, PostgreSQL, Docker, Maven*
- Built a database workspace supporting 10+ relational and NoSQL systems, combining Java services, PostgreSQL queries, TypeScript interfaces, schema-aware reporting, Docker, Maven, and Linux-compatible debugging and deployment workflows.

PiXMod | Live | *AngularJS, Next.js, TypeScript, MongoDB, Stripe*
- Developed responsive AngularJS and Next.js user interfaces with REST integrations, Stripe payments, MongoDB queries, reusable modules, and customized workflow tools, reliably processing 1,000+ user-edited digital assets.
