Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | LinkedIn | GitHub | Portfolio

Summary

Application developer with 2+ years building secure, database-driven web services, responsive interfaces, and cloud applications. Experienced in Java, PHP, JavaScript, Python, React, REST APIs, SQL, Linux, application migration, automated testing, and production support.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built secure Python APIs, Azure SQL services, and responsive dashboards for 500+ users, translating business requirements into database-driven web applications while reducing latency from 1.2 seconds to 350 milliseconds.
- Supported 5,000+ monthly production jobs using explicit states, retries, reconciliation, and failure isolation, tripling throughput while improving data integrity, observability, issue diagnosis, and reliable application maintenance.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed responsive React interfaces and Flask REST services for upload, routing, status, and history workflows, translating user requirements into maintainable web applications supporting 150+ users and 10,000+ daily requests.
- Created concurrent processing for 1,000+ files with automated validation, AWS RDS persistence, and structured error handling, reducing turnaround 60% while supporting secure, scalable three-tier application behavior.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Developed REST services and database integrations using Python, SQL, AWS Glue, and S3, improving response times 30% and processing efficiency 68% across secure, scalable customer-facing business applications.
- Maintained 20+ automated unit and integration suites with Jenkins, PyTest, and Mockito across Windows and Linux environments, accelerating debugging, application upgrades, and overall confidence in production releases.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Developed modular React and Node.js web applications across eight customer, billing, permissions, and notification workflows, synchronizing 2 million+ Azure SQL records through maintainable services and real-time WebSockets.
- Automated Docker builds, tests, staged deployments, and production monitoring through Jenkins and Azure, reducing release time 50% while improving cloud-migration readiness, application quality, and overall operational reliability.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built Flask APIs and responsive application workflows for reservations, scheduling, status updates, and payments across 50,000+ records, translating business requirements into secure database-driven public online services.
- Implemented Firebase persistence, webhooks, and secure payment synchronization with structured validation and error handling, reducing manual payment processing 70% while improving transaction visibility, reconciliation, and user experience.

Skills

Languages & Web: Java, PHP, Python, JavaScript, TypeScript, SQL, HTML5, CSS3, React, Node.js, Flask, responsive web applications
Architecture & Services: REST APIs, JSON, WebSockets, three-tier architecture, client-server systems, microservices, database-driven applications, API integration, secure interfaces, payment workflows
Data & Cloud: PostgreSQL, MySQL, Azure SQL, SQL Server, MongoDB, Firebase, AWS RDS, AWS, Azure, Amazon S3, Blob Storage, data modeling, indexing, query optimization
Linux & Delivery: Linux, Bash, Git, Docker, Jenkins, CI/CD, PyTest, Mockito, unit testing, integration testing, debugging, application migration, upgrades, deployment, maintenance, production support, Agile, SDLC

Projects

HMIS | Live | *TypeScript, React, REST APIs, Appwrite, Sentry, Twilio*
- Built user-friendly public service workflows for appointments and records using responsive interfaces, secure APIs, authentication, notifications, and monitoring, supporting 100+ daily transactions while reducing administrative workload 30%.

FinNexus | Live | *TypeScript, React, REST APIs, WebSockets, MongoDB, Kubernetes*
- Built secure eCommerce-style payment workflows supporting 50,000+ users and one million transactions, integrating REST APIs, real-time synchronization, advanced filters, MongoDB persistence, Kubernetes, and automated CI/CD deployment.

Chat2SQL | Code | *Java, TypeScript, SQL, PostgreSQL, Docker, Maven*
- Built a database-driven web workspace supporting 10+ relational and NoSQL systems, combining Java services, TypeScript interfaces, schema-aware SQL generation, Docker, Maven, and secure, scalable Linux-compatible deployment workflows.
