Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | LinkedIn | GitHub | Portfolio

Summary

Full-stack web developer with 2+ years building responsive interfaces, secure applications, REST APIs, database-backed workflows, and production websites. Experienced in JavaScript, TypeScript, React, Node.js, Python, HTML5, CSS3, SQL, testing, documentation, and stakeholder support.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built secure web services and operational dashboards for 500+ university users using Python, Azure SQL, and Blob Storage, reducing page-data response latency from 1.2 seconds to 350 milliseconds.
- Implemented maintainable workflow features for 5,000+ monthly jobs using explicit states, validation, retries, reconciliation, and failure isolation, tripling throughput while improving usability, observability, and responsive production support.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed responsive React interfaces and Flask REST services handling 10,000+ daily requests, implementing secure uploads, authentication, grading history, and feedback workflows while supporting 150+ university instructors in production.
- Created concurrent processing for 1,000+ files with validation, AWS RDS persistence, status updates, and structured error handling, reducing feedback turnaround 60% while maintaining reliable production performance during peak demand.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Developed Python services, SQL integrations, and REST APIs using AWS Glue and S3, implementing filtering and pagination that improved response times 30% and data-processing efficiency 68% in production.
- Maintained 20+ automated unit and integration suites with Jenkins, PyTest, and Mockito across Windows, Linux, and macOS, accelerating issue diagnosis, release validation, and reliable production deployments across environments.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Developed responsive React and Node.js features across eight services with reusable components, JWT authentication, and role-based access controls, synchronizing 2 million+ Azure SQL records through REST APIs and WebSockets.
- Automated Docker builds, browser-facing tests, staged deployments, and production monitoring through Jenkins and Azure, reducing release time 50% while improving website quality, consistency, and operational visibility across environments.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built responsive booking workflows and Flask APIs for reservations, scheduling, status updates, and payments across 50,000+ records, translating client requirements into maintainable web features with secure Firebase access.
- Implemented Firebase persistence, webhooks, and payment synchronization with structured validation and logging, reducing manual payment handling 70% while improving issue visibility, integration reliability, and responsive user support.

Skills

Web & Languages: JavaScript, TypeScript, HTML5, CSS3, Python, Java, SQL, React, Next.js, Node.js, responsive design, reusable components
Backend & Integration: Flask, FastAPI, REST APIs, JSON, WebSockets, authentication, authorization, JWT, role-based access control, webhooks, file uploads, API integration
Data & Cloud: PostgreSQL, Azure SQL, SQL Server, MySQL, MongoDB, Firebase, AWS RDS, AWS, Azure, S3, Blob Storage, data modeling, query optimization
Quality & Delivery: Git, Docker, Kubernetes, Jenkins, CI/CD, PyTest, Mockito, unit testing, integration testing, debugging, logging, monitoring, documentation, production support, Agile, stakeholder collaboration

Projects

HMIS | Live | *TypeScript, React, REST APIs, Appwrite, Sentry, Twilio*
- Built responsive institutional workflows for appointments, records, and notifications using React, REST APIs, authentication, Appwrite, Twilio, and Sentry monitoring, supporting 100+ daily interactions while reducing administrative workload 30%.

PiXMod | Live | *Next.js, TypeScript, MongoDB, Stripe, CLIP, SAM*
- Built a responsive Next.js and TypeScript image-editing application with reusable interface components, secure authentication, MongoDB persistence, Stripe integration, and AI-assisted image workflows across desktop and mobile devices.

FinNexus | Live | *TypeScript, React, REST APIs, WebSockets, MongoDB, Kubernetes*
- Built responsive financial interfaces supporting 50,000+ users and one million transactions, integrating REST APIs, real-time synchronization, granular filters, MongoDB persistence, validation, monitoring, and automated Kubernetes deployment through CI/CD.
