Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Cloud engineer with 2+ years across **Azure**, **AWS**, and **GCP**, supporting **cloud migration/modernization**, automated resource provisioning, and production deployments across compute, storage, databases, and networking in hybrid environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Computer Networks, Database Systems, Software Engineering, Systems Administration

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Operating Systems, Software Engineering, Systems Administration, Data Analysis

Experience

USC Dornsife **Los Angeles, CA**
Cloud Engineer *September 2025 – Present*
- Designed and deployed **Azure SQL, Blob Storage, and compute** services for 500+ users, creating provisioning scripts and configuration templates for repeatable environment setup in production workloads.
- Led **cloud migration and modernization** workstreams for hybrid data pipelines (5K+ monthly jobs), validating storage/network integrations and resolving production incidents independently.

Grad8 **Los Angeles, CA**
Cloud Operations Intern *June 2025 – August 2025*
- Supported **AWS RDS, storage, and CI/CD** services for 150+ users, troubleshooting compute/database issues and documenting runbooks for high-availability web application delivery.
- Collaborated on cloud deployment tasks with engineers, contributing to release readiness and infrastructure consistency across development and production environments.

USC AD Labs **Los Angeles, CA**
Cloud Operations Assistant *January 2025 – May 2025*
- Built **Python automation scripts** and operational SOPs for research platforms, improving environment consistency, monitoring visibility, and cross-team handoffs on infrastructure tasks.
- Contributed to platform reliability reviews and configuration updates, supporting scalable service operations in a collaborative project team.

Aasma Technology Solutions **India**
Cloud Engineer - (SecureSync) *August 2023 – July 2024*
- Implemented **AWS cloud migration integrations** (Glue, S3, APIs) with automated Jenkins pipelines, improving data movement performance by **30%** across distributed storage and compute services.
- Maintained containerized deployment workflows and infrastructure automation, increasing CI/CD reliability by **68%** while supporting production troubleshooting on Windows/Linux environments.

FedCloud Systems **India**
Cloud Engineer Intern *January 2023 – April 2023*
- Assisted with **Azure/AWS provisioning templates** and Bash/Python scripts for automated resource deployment across compute, storage, and network components in migration pilot environments.
- Supported **serverless and container** configuration tasks (Lambda/Azure Functions concepts) and Ansible-style automation workflows under senior cloud engineers on modernization initiatives.

Skills

Cloud Platforms: **Azure**, **AWS**, **GCP**; compute, storage, databases, networking; VMware/Oracle Cloud exposure
Migration & IaC: Cloud migration/modernization, Terraform, Ansible/Chef concepts, provisioning scripts/templates, hybrid architectures
DevOps: Docker, Kubernetes basics, Jenkins, Git; serverless (Lambda, Azure Functions), Python, Bash
Practices: Production deployments, incident troubleshooting, documentation, independent project delivery

Projects

CloudMigrate Toolkit | *Azure, AWS, Python, Terraform*
- Built migration automation scripts and infrastructure templates for moving workloads across cloud storage, database, and compute services with validation checkpoints.

Linguistix Code | *AWS ECS, Docker, CI/CD, Serverless Concepts*
- Deployed a containerized API on **AWS** with automated CI/CD pipelines, demonstrating production-style cloud service delivery and operational monitoring practices.

InfraAutomator | *Ansible, Bash, Multi-Cloud Provisioning*
- Created reusable provisioning playbooks and scripts for automated environment setup across development, test, and staging cloud resources.
