Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack developer with 2+ years building applications using **Python, React, and Node.js**. Experience with AWS Serverless, relational/NoSQL databases, and AI-based solutions in Agile environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Web Technologies, Database Systems, Machine Learning, Software Engineering

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Full Stack Development, Data Structures, Cloud Computing, Agile Methodologies

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built and maintained **full-stack applications using Python and React**, developing dynamic front-end interfaces and backend services while participating in unit testing and code reviews.
- Collaborated closely with senior engineers in **Agile environment**, supporting sprint planning and iterative development to deliver high-quality software solutions.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **full-stack applications using Python, React, and Node.js**, contributing to AI-based automation initiatives that improved business processes for 10K+ daily users.
- Worked closely with senior engineers and solution architects, writing clean, maintainable code and participating in **unit testing and code reviews** in Agile sprints.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Contributed to **AI model development and automation** initiatives using Python, implementing solutions that improved processing efficiency by 18% through innovative approaches.
- Demonstrated **eagerness to learn** new technologies and frameworks, adopting modern tools while collaborating effectively with cross-functional research teams.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Built **full-stack applications using Python, React, and Node.js**, leveraging AWS Serverless (Lambda, API Gateway) for cloud-native solutions with 68% efficiency improvement.
- Worked with **relational and NoSQL databases** (PostgreSQL, MongoDB), supporting Agile delivery through sprint planning, backlog grooming, and iterative development.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Assisted in building **full-stack applications using React and Node.js**, developing dynamic front-end interfaces and server-side solutions handling 2M+ database records.
- Demonstrated excellent **communication and collaboration skills**, working as a team player while continuously learning and adopting new technologies in Agile environment.

Skills

Frontend: React, JavaScript, TypeScript, HTML, CSS, dynamic UI development
Backend: Python, Node.js, Flask, FastAPI, Express, RESTful APIs
Cloud & Serverless: AWS (Lambda, API Gateway, S3, DynamoDB), serverless architecture
Databases & Tools: PostgreSQL, MongoDB, MySQL, Git, Agile/Scrum, unit testing

Projects

FinNexus Live | *React, Node.js, TypeScript, MongoDB*

- Built **full-stack application using React and Node.js** for financial data management, implementing dynamic front-end interfaces and server-side APIs supporting 50K+ users.

Big-Brain Live | *Python, React, PostgreSQL, AI/ML*

- Developed **AI-powered application using Python and React**, contributing to automation solutions that process 50K+ documents with innovative agentic approaches.

Linguistix Code | *Python, AWS Lambda, API Gateway, Serverless*

- Built **cloud-native solution using AWS Serverless** (Lambda, API Gateway), demonstrating proficiency in serverless architecture and modern deployment practices.
