Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack engineer with 2+ years shipping **React/TypeScript** and **Java/Python/Node.js** features on **PostgreSQL** and **AWS**. Product-minded builder who uses **AI-assisted tools** (Copilot, Cursor) to deliver secure, measurable customer workflows with strong testing and production support discipline.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Database Systems, Web Technologies, Software Engineering, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built full-stack platform services with **Python APIs and PostgreSQL** for 500+ users, reducing latency from **1.2s to 350ms** through instrumentation-driven optimization and release-ready validation checks.
- Owned integration workflows (5K+ monthly jobs) with testing, CI/CD deployment, and production triage, achieving 99%+ reliability while documenting system behavior for shared team context.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Delivered customer-facing **React + Python API** features handling 10K+ daily requests, collaborating with product and engineering partners on iterative scope, edge cases, and post-release improvements.
- Used **AI-assisted development** to accelerate implementation while reviewing generated code for clarity and correctness, reducing turnaround by **60%**.

USC AD Labs **Los Angeles, CA**
Software Engineering Assistant *January 2025 – May 2025*

- Implemented backend data services across 100K+ records with reproducible tests and technical documentation, supporting measurable quality outcomes and cross-team knowledge sharing.
- Contributed to code reviews and structured debugging practices, strengthening operational discipline as features moved toward production readiness.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Developed **Java/Python microservices** and **REST APIs** on **AWS**, improving response time by **30%** with secure, maintainable backend design for distributed customer integrations.
- Maintained **20+ automated test suites** and Jenkins CI/CD pipelines, increasing release confidence by **68%** and supporting production issue investigations.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **Node.js/MERN** modules with **PostgreSQL/MongoDB** backends and real-time WebSocket APIs, delivering responsive customer workflows across 2M+ synchronized records.
- Automated Docker/Jenkins deployments, cutting release time by **50%** and improving support readiness through clearer operational runbooks.

Skills

Full Stack: **TypeScript**, **React**, JavaScript, HTML/CSS, **Java**, **Python**, Node.js, REST APIs
Data & Cloud: **PostgreSQL**, MySQL, MongoDB, **AWS**, Docker, query tuning, cloud service integrations
Product Engineering: Testing/release readiness, production triage, documentation, metrics-minded delivery, Agile collaboration
AI Tools: GitHub Copilot, Cursor, thoughtful AI-assisted workflows with accountability and code review

Projects

PiXMod Live | *React, TypeScript, MongoDB, Stripe*

- Shipped a customer-facing **React SaaS** product with billing workflows, iterative UX improvements, and measurable conversion impact (**+18%**).

Chat2SQL Code | *Java, TypeScript, PostgreSQL, Docker*

- Built full-stack services with **Java/TypeScript**, multi-database integrations, and production-style error handling across client and API layers.

Linguistix Code | *Python, AWS, CI/CD, Monitoring*

- Deployed a cloud-native API on **AWS** with automated validation gates and operational monitoring for reliable post-release behavior.
