Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

IT professional with experience in **security monitoring, incident investigation, and risk assessment**. Skilled in analyzing security logs using query languages (SQL/KQL), developing security policies, and collaborating with cross-functional teams to implement security solutions.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Computer Security, Network Security, Database Systems, Risk Management

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Information Security, Cryptography, Computer Networks, Operating Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Implemented **data protection and security compliance** measures for web applications, conducting security reviews and ensuring adherence to security policies and procedures.
- Developed technical documentation and **security training materials** for staff, establishing cooperative working relationships with cross-functional teams to complete security-related assignments.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Supported **security compliance and risk mitigation** activities for production systems, analyzing data and presenting recommendations to stakeholders on security improvements.
- Demonstrated ability to **analyze and solve technical problems**, working independently while maintaining cooperative relationships with team members at all levels.

LST Capital **India**
Security Analyst Intern *May 2024 – July 2024*
- Conducted **security assessments and risk evaluations** across IT infrastructure, identifying vulnerabilities and recommending mitigation strategies to protect sensitive financial data and systems.
- Investigated **suspicious emails and potential security threats**, analyzing security logs using SQL queries to identify patterns and support incident response activities with detailed documentation.
- Collaborated with IT teams and management to **implement security solutions** and develop security policies, standards, and procedures aligned with compliance requirements.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Developed **security monitoring and incident response** capabilities for cloud infrastructure, investigating potential security events and supporting data loss prevention initiatives.
- Created and implemented **security and data protection settings**, managing access controls and ensuring compliance with security standards across multi-tenant environments.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Implemented **security controls and data privacy measures** for web applications, supporting security compliance and contributing to security policy documentation.
- Collaborated with internal teams and vendors to **implement security solutions**, demonstrating flexibility and professionalism in a fast-paced environment.

Skills

Security: Security assessments, incident response, risk evaluation, data loss prevention, compliance
Query Languages: SQL, KQL basics, log analysis, data querying and manipulation
Tools: SIEM platforms, cloud security (AWS, GCP), Git, Microsoft Office, presentation software
Soft Skills: Technical documentation, security training, stakeholder communication, collaboration

Projects

SecureLog Analyzer | *Python, SQL, Log Analysis, Security Monitoring*
- Developed **security log analysis tool** to investigate potential security incidents, analyzing logs using SQL queries to identify suspicious patterns, anomalies, and potential threats across IT infrastructure.

ThreatWatch Dashboard | *Python, React, Security Monitoring, Incident Response*
- Built **security monitoring dashboard** for incident response support, providing real-time visualization of security events, threat detection alerts, and risk assessment metrics for security teams.

ComplianceGuard | *Python, Security Policies, Risk Assessment, Automation*
- Created **automated security compliance checker** to evaluate IT infrastructure against security policies and standards, generating reports and recommendations for risk mitigation activities.
