Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack engineer with 2+ years building **scalable software applications** using Python, JavaScript, and React. Proficient in SQL, Node.js, cloud platforms (GCP, AWS), and distributed systems with APIs and microservices.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Database Systems, Web Technologies, Distributed Systems, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Data Structures, Database Management, Cloud Computing

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Designed and built **scalable software applications using Python and React**, developing user interfaces and server-side solutions that process 5K+ monthly requests with high performance and reliability.
- Leveraged **cloud platforms (GCP)** for development and deployment, collaborating with cross-functional teams to deliver high-quality software solutions using Agile methodologies.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **full-stack applications using Python, JavaScript, and React**, building server-side solutions with Node.js that handled 10K+ daily requests across distributed microservices architecture.
- Built and optimized **APIs and data streams** for real-time processing, troubleshooting performance issues and applying scalability improvements in a fast-paced Agile environment.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Built **data pipelines using Python and SQL** for large-scale analytics processing, deploying applications on GCP cloud infrastructure with 18% performance improvement through optimization.
- Collaborated with cross-functional teams to translate analytical goals into technical solutions, demonstrating strong problem-solving and communication skills.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Designed and developed **high-performance distributed systems** using Python and Node.js, building RESTful APIs and microservices that improved system efficiency by **68%**.
- Implemented **CI/CD pipelines using Git and Jenkins**, leveraging Docker for containerized deployments on AWS cloud platform with automated testing and quality assurance.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **scalable software applications using React, Node.js, and JavaScript**, developing user interfaces and server-side solutions handling 2M+ records across SQL and NoSQL databases.
- Designed and deployed **APIs and microservices architecture**, collaborating with cross-functional teams in Agile sprints to deliver high-quality software solutions.

Skills

Languages: Python, JavaScript, TypeScript, Java, SQL (PostgreSQL, MySQL)
Frontend: React, Next.js, Angular basics, HTML, CSS, responsive UI development
Backend: Node.js, Express, Flask, FastAPI, RESTful APIs, microservices
Cloud & DevOps: GCP, AWS, Docker, Git, Jenkins, CI/CD pipelines, Agile/SAFe

Projects

Big-Brain Live | *Python, GCP, PostgreSQL, React*

- Built **scalable cloud application on GCP** with Python backend and React frontend, implementing data pipelines and SQL queries to process 50K+ documents with 95% accuracy.

FinNexus Live | *React, Node.js, TypeScript, MongoDB*

- Developed **full-stack application using React and Node.js**, building user interfaces and server-side APIs supporting 50K+ users with real-time data streams and microservices architecture.

Chat2SQL Code | *Python, SQL, React, Natural Language Processing*

- Built **analytics application with Python and SQL**, developing React interface for natural language to SQL conversion enabling efficient data querying and manipulation.
