Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack developer with 2+ years building **Java/Spring Boot microservices**, **Angular** applications, and **REST APIs** with **Kafka**, relational/NoSQL databases, **JUnit/Mockito** testing, and **CI/CD** in Agile enterprise delivery environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Software Engineering, Database Systems, Analysis of Algorithms, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Applications Development Programmer Analyst *September 2025 – Present*

- Developed backend services and **REST integrations** for 500+ users, optimizing SQL access patterns and resolving production incidents while supporting secure, fault-tolerant data workflows across distributed components.
- Implemented **automated integration and unit-style validation** for 5K+ monthly jobs with CI/CD releases, improving reliability and reducing technical debt through structured testing and defect triage.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Delivered **full-stack features and REST APIs** handling 10K+ daily requests in Agile sprints, collaborating with engineers on code reviews, debugging, and release readiness for customer-facing web applications.
- Analyzed application behavior to identify vulnerabilities and performance issues, implementing fixes that reduced turnaround time by **60%** under production instructor workloads.

USC AD Labs **Los Angeles, CA**
Software Engineering Assistant *January 2025 – May 2025*

- Built scalable processing components across 100K+ records with reproducible test scenarios, supporting integration validation and structured documentation for cross-functional engineering teams.
- Partnered with senior engineers on technical recommendations, risk-aware solution design, and iterative delivery of platform enhancements in a complex team environment.

Aasma Technology Solutions **India**
Java Microservices Developer - (SecureSync) *August 2023 – July 2024*

- Engineered **Spring Boot microservices** and **REST APIs** with event-driven ETL integrations on AWS, improving response time by **30%** while applying domain-driven service boundaries and fault-tolerant patterns.
- Maintained **20+ JUnit/Mockito test suites** in Jenkins CI/CD pipelines, increasing release reliability by **68%** through unit, integration, and regression automation in Agile Scrum delivery.

EnterpriseApps Systems **India**
Full Stack Java Developer Intern *January 2023 – April 2023*

- Built **Angular** UI modules and **Hibernate**-backed **Java/Spring** services with Oracle and MongoDB persistence, implementing REST endpoints and secure coding practices for enterprise workflows.
- Supported **Kafka-based asynchronous messaging** prototypes and GitHub pull-request workflows, contributing to microservices deployment automation and production incident troubleshooting.

Skills

Core: **Java**, **Spring Boot**, Spring, **Angular**, Hibernate, REST APIs, microservices patterns (CQRS/Saga exposure)
Data & Messaging: Oracle, PostgreSQL, MySQL, MongoDB, **Kafka**, RabbitMQ/JMS concepts
Quality & Delivery: JUnit, Mockito, contract/performance testing exposure, Maven, GitHub, Jenkins CI/CD, Docker/Kubernetes exposure
Cloud & Security: AWS/Azure exposure, OAuth2/JWT concepts, observability, Agile/Scrum

Projects

Chat2SQL Code | *Java, Spring, Maven, Oracle, Docker*

- Built an enterprise-style **Java full-stack workspace** with REST services, multi-database integrations (Oracle, PostgreSQL, MongoDB), and Docker-backed CI-ready development workflows.

SpringFlow Services | *Spring Boot, Kafka, Microservices, JUnit*

- Designed **event-driven microservices** with API gateway patterns, distributed tracing concepts, and automated unit/integration tests for fault-tolerant backend communication.

AngularOps Portal | *Angular, Hibernate, REST, Oracle*

- Developed an **Angular enterprise portal** consuming Spring REST APIs with role-based workflows, relational data modeling, and secure client-server integration patterns.
