Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack engineer with 2+ years shipping **Python** and **TypeScript/JavaScript** features in **fintech** and data-heavy systems. Experienced with **ETL pipelines**, **unit testing**, and **AWS serverless**. AI-native developer using **Cursor and Copilot** daily. Mission-driven builder passionate about technology that expands access to education and economic mobility.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Database Systems, Software Engineering, Web Technologies, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Database Management, Data Structures, Web Development

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built and maintained full-stack platform features in **Python and TypeScript**, writing **unit tests as standard practice** and participating actively in code reviews and design discussions.
- Contributed to **observable ETL pipelines** and data quality checks, catching edge cases and data integrity issues in production workflows with high attention to detail.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Shipped end-to-end features using **Python, TypeScript, and React** in a startup environment, deploying **AWS Lambda** serverless functions with clear documentation and early blocker communication.
- Used **Cursor and GitHub Copilot** to generate tests and accelerate refactors while verifying AI output for correctness and production readiness.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Developed reliable data processing jobs in **Python** with validation rules and monitoring, serving as first line of defense for data quality in analytics pipelines.
- Documented technical decisions clearly for non-engineer stakeholders, demonstrating strong written communication and learner mindset.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Built **fintech-style** backend services in **Python (FastAPI)** and **TypeScript/Node.js** with payment and financial data integrations, treating accuracy and compliance constraints as engineering requirements.
- Implemented admin-facing operational tooling and automated tests across loan-style workflow modules, improving system correctness and reliability by 68%.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Delivered tested features in **JavaScript/TypeScript** with PostgreSQL, wearing multiple hats in fast-paced startup and bringing side-project learnings back to production work.
- Integrated third-party financial data APIs with careful edge-case handling, building systems where correctness is the default path.

Skills

Languages: Python, TypeScript, JavaScript, SQL
Full Stack: React, Node.js, FastAPI, REST APIs, PostgreSQL
Data & Cloud: ETL pipelines, data quality validation, AWS Lambda, serverless, observability
Practices: Unit testing, code reviews, documentation, Git, CI/CD, AI-native workflow (Cursor, Copilot, Claude)

Projects

FinNexus Live Code | *Python, TypeScript, React, PostgreSQL*

- Shipped **fintech platform** with lending-style workflows, admin dashboards, and payment integrations — demonstrating end-to-end ownership and financial data accuracy focus.

LendFlow | *Python, TypeScript, ETL, AWS Lambda*

- Built **loan origination and servicing** prototype with reliable ETL jobs, observable data flows, and comprehensive unit tests for financial record processing.

Chat2SQL Code | *Python, TypeScript, PostgreSQL, Unit Testing*

- Created data-centric tool with strict validation and test coverage, showcasing learning velocity, curiosity, and attention to data integrity edge cases.
