Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack engineer with 2+ years building secure, scalable applications using **React, Next.js, TypeScript**, and **Python (Flask/FastAPI)**. Experienced with **REST APIs**, microservices, **PostgreSQL/MongoDB**, and deploying **Generative AI solutions** on **AWS and GCP**. Passionate about cybersecurity engineering and delivering high-quality client outcomes.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Software Engineering, Database Systems, Computer Networks, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Data Structures, Database Management, Information Security

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Designed, developed, tested, and enhanced **full stack applications** using **Next.js, React, TypeScript, HTML5, and CSS3** with **Python** backend services on **AWS**.
- Integrated **Generative AI and agentic AI** capabilities into enterprise workflows, following **secure development practices**, code reviews, and **CI/CD** pipelines.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Built and consumed **REST APIs** and **microservices** in production using **Node.js and Python**, deploying containerized services with **Docker** in **Agile/Scrum** sprints.
- Collaborated with cross-functional stakeholders to translate business needs into technical solutions with meticulous attention to detail and quality.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Developed and deployed **AI solutions on GCP**, building observable data pipelines and automated tests for model-driven security analytics features.
- Contributed to technical analysis and solution design documentation, communicating clearly with engineers and non-technical partners.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Shipped secure full-stack features with **React, TypeScript, Python (Flask)**, **PostgreSQL**, and **MongoDB**, implementing **web security** controls and reusable component architecture.
- Maintained production **serverless and microservice** integrations with automated testing, Git workflows, and continuous deployment practices.

CyberTech Solutions **India**
Full Stack Developer Intern *January 2023 – April 2023*

- Built cybersecurity dashboard applications using **React, JavaScript, and Python**, integrating threat data APIs and supporting secure, responsive user interfaces.
- Applied clean coding practices and object-oriented design patterns while working independently and as part of a fast-paced engineering team.

Skills

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, responsive design
Backend: Node.js, Python (Flask, FastAPI), REST APIs, microservices, serverless
Data & Cloud: PostgreSQL, MySQL, MongoDB, AWS, GCP, Azure basics, Docker, Kubernetes basics
Security & AI: GenAI/agentic AI integration, secure development, CI/CD, Git, automated testing, Agile/Scrum

Projects

CyberGuard AI | *Next.js, Python, AWS, Generative AI*

- Built enterprise-style **cybersecurity application** with GenAI-powered threat analysis, secure API integrations, and cloud deployment on AWS.

Big-Brain Live | *React, Python, GCP, LLM Integration*

- Deployed **Generative AI solution** with maintainable full-stack architecture, automated testing, and production observability.

FinNexus Live | *React, Node.js, PostgreSQL, MongoDB, CI/CD*

- Developed secure, scalable full-stack platform with relational and NoSQL databases, REST APIs, and CI/CD delivery pipeline.
