Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack engineer with 2+ years building high-performance web applications using **Next.js, TypeScript, and Node.js**. Experienced with **CMS integrations**, **REST APIs**, and **AI-driven development** using **Cursor**. Passionate about digital media, performance optimization, and shipping scalable editorial and product experiences.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Web Technologies, Database Systems, Software Engineering, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Web Development, Software Engineering, Data Structures, Database Management

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Designed, developed, tested, and deployed **Next.js** applications with **TypeScript**, optimizing performance, accessibility, and user experience for content-driven platforms.
- Leveraged **Cursor** for AI-driven development to accelerate feature delivery, rapidly prototype UI changes, and maintain high code quality through automated tests and CI/CD.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Built scalable backend systems with **RESTful APIs** integrating headless **CMS** workflows, enabling efficient content publishing and dynamic personalized experiences.
- Collaborated with designers and product managers to translate business requirements into technical solutions, using data-informed decisions to improve engagement metrics.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Developed internal editorial productivity tools using **Next.js/React**, reducing content workflow time through automation and intuitive admin interfaces.
- Analyzed application performance and reliability metrics, continuously optimizing for speed and scalability in fast-paced environment.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Shipped full-stack features with **Next.js, TypeScript, and Node.js**, building CMS-connected publishing pipelines and third-party API integrations for multi-channel digital products.
- Implemented automation tests and DevOps practices, improving deployment reliability and supporting measurable business outcomes.

Digital Media Labs **India**
Full Stack Developer Intern *January 2023 – April 2023*

- Built editorial website features in **Next.js and JavaScript**, working with content teams on CMS custom integrations and monetization-ready page components.
- Used **Cursor and Copilot** to prototype features quickly, demonstrating fast learning and eagerness to explore new web technologies.

Skills

Frontend: Next.js, TypeScript, JavaScript, React, HTML/CSS, accessibility, performance optimization
Backend & CMS: Node.js, REST APIs, headless CMS integration, serverless, PostgreSQL
Practices: Cursor/AI-driven development, automated testing, CI/CD, DevOps, Git, A/B testing basics
Media: Content workflows, editorial tools, ads-ready component patterns, data-driven development

Projects

MediaHub CMS | *Next.js, TypeScript, Headless CMS, REST APIs*

- Built **digital publishing platform** with Next.js and CMS integrations, supporting dynamic content delivery, editor workflows, and performance-optimized article pages.

FinNexus Live | *Next.js, TypeScript, Node.js*

- Shipped high-performance full-stack web application with scalable architecture, strong UX, and production deployment for global audience use cases.

Big-Brain Live | *Next.js, TypeScript, Cursor, Vercel*

- Developed AI-enabled content application using **Cursor-accelerated** workflow, from rapid prototype to production-ready stand-alone product in days.
