Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Frontend engineer with 2+ years building **TypeScript** and **React** applications for high-impact, user-facing products. Experienced developing intuitive, performant web UIs with strong **security**, accessibility, and quality standards. Passionate about healthcare technology that improves patient outcomes.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Web Technologies, Software Engineering, Database Systems, Human-Computer Interaction

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Web Development, Software Engineering, Data Structures, UI/UX Design

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Designed and developed **customer-facing interactive web applications** using **TypeScript and React**, making data-driven UI decisions while maintaining high standards for performance and user experience.
- Collaborated with API, Product, and QA teams in **Agile** workflows, implementing **web security best practices**, observability, and documentation aligned with quality assurance processes.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Built responsive frontend features with **TypeScript, JavaScript, HTML, and CSS**, integrating REST APIs for seamless functionality across client and backend systems.
- Implemented unit and integration tests for UI components, contributing to scalable, maintainable code and continuous improvement culture.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Developed **healthcare analytics dashboards** in **React/TypeScript** for clinical research workflows, presenting complex medical data in digestible visual formats for broad audiences.
- Maintained detailed technical documentation and QA-ready release notes, demonstrating detail orientation and commitment to team success.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Led frontend development of enterprise web applications using **TypeScript and React**, optimizing performance and accessibility for production users across distributed teams.
- Partnered with UI/UX and backend engineers to ship secure, observable interfaces with rigorous code review and testing standards.

MedTech UI Labs **India**
Frontend Developer Intern *January 2023 – April 2023*

- Built intuitive **medical web interfaces** in **TypeScript/React** for clinician-facing tools, supporting regulated software workflows with clear documentation and quality checks.
- Applied web security fundamentals and component-driven architecture to deliver reliable, high-performance client applications.

Skills

Frontend: TypeScript, JavaScript, React, HTML5, CSS3, responsive design, component architecture
Quality: Unit/integration testing, performance optimization, accessibility, observability
Practices: Agile, Git, web security, API integration, documentation, cross-functional collaboration
Domain: Healthcare UI, data visualization, regulated software awareness

Projects

CardioView | *TypeScript, React, D3.js, REST APIs*

- Built **interactive cardiac data visualization** web app for clinicians, rendering complex medical metrics through intuitive, high-performance TypeScript/React interfaces.

Big-Brain Live | *TypeScript, React, Node.js*

- Shipped production web application with polished UX, secure API integration, and scalable frontend architecture used by real users.

FinNexus Live | *TypeScript, React, Performance Optimization*

- Developed customer-facing dashboard with strong attention to detail, edge-case handling, and maintainable component design patterns.
