Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | sahaj-bhadja | sahajbhadja | sahaj-bhadja

Summary

Full-stack product engineer with 2+ years shipping **TypeScript/React/Next.js** features and **PostgreSQL/Supabase** backends end-to-end. Strong product sense, data-heavy UI experience, and daily use of **AI coding tools** (Cursor, Copilot) to deliver polished, production-ready workflows.

Education

University of Southern California, Los Angeles, CA — **August 2024 – May 2026**
Master of Science in Computer Science — *GPA: 3.75/4.0*
Coursework: Database Systems, Web Technologies, Software Engineering, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India — **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering — *GPA: 3.88/4.0*
Coursework: Software Engineering, Object-Oriented Programming, Data Retrieval, Operating Systems

Experience

USC Dornsife — **Los Angeles, CA**
Full Stack Product Engineer — *September 2025 – Present*

- Owned end-to-end features on a multi-tenant platform using **TypeScript, FastAPI, Supabase, and PostgreSQL/SQL Server**, serving 500+ users and cutting dashboard latency from **1.2s to 350ms** through query tuning and UX-focused performance work.
- Shipped data integration workflows (5K+ monthly jobs) with validation, error handling, and CI/CD releases, partnering with stakeholders to translate complex requirements into reliable product behavior.

Grad8 — **Los Angeles, CA**
Software Engineer Intern — *June 2025 – August 2025*

- Built and shipped **React + Python API** product features in an early-stage startup, handling 10K+ daily requests with attention to edge cases, loading states, and iterative scope with product partners.
- Reduced user turnaround by **60%** through AI-assisted workflow improvements while maintaining production quality via code reviews and rapid release cycles.

USC AD Labs — **Los Angeles, CA**
Software Engineering Assistant — *January 2025 – May 2025*

- Delivered data processing features across 100K+ records with reproducible validation, clear documentation, and cross-functional communication on trade-offs and implementation approach.
- Improved engineering standards through structured reviews, test scenarios, and pragmatic prioritization in a fast-moving research product environment.

Aasma Technology Solutions — **India**
Software Developer Engineer - (SecureSync) — *August 2023 – July 2024*

- Built **API services and analytics-oriented data workflows** on AWS with relational schemas, improving response time by **30%** and supporting entity-style data management across production systems.
- Maintained automated test suites and Jenkins CI/CD pipelines (20+ suites), increasing release confidence by **68%** through consistent code review and quality practices.

Aasma Technology Solutions — **India**
Full Stack Developer Intern - (VibrantChem) — *May 2023 – August 2023*

- Developed **MERN dashboard modules** with real-time updates (WebSockets) for 2M+ records across workflows, focusing on responsive UX, search/list views, and operational visibility for business users.
- Automated Docker/Jenkins deployments, cutting release time by **50%** and enabling faster iteration with design and engineering collaborators.

Skills

Full Stack: **TypeScript**, **React**, **Next.js**, Node.js, Python, REST APIs, server-side data access
Data & Platforms: **PostgreSQL**, **Supabase**, SQL Server, MongoDB, schema design, query optimization
Product & Delivery: Data tables/dashboards, UX polish (loading/error states), Vercel-style deployments, Git, CI/CD
AI Tools: Cursor, GitHub Copilot, LLM-assisted development with critical code review

Projects

PiXMod Live | *Next.js, TypeScript, MongoDB, Stripe*

- Shipped a production **Next.js SaaS** with billing, search workflows, and polished user flows; improved conversion by **18%** through iterative product-focused UX improvements.

AssetView Dashboard | *Next.js, TypeScript, PostgreSQL, Charts*

- Built a data-heavy dashboard prototype with entity management tables, filtering, and performance metrics visualization for asset workflow monitoring.

Chat2SQL Code | *TypeScript, Java, SQL, Docker*

- Developed a full-stack data workspace supporting 10+ databases with schema exploration, query workflows, and production-style error handling across client and server layers.
