Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Frontend-focused software engineer with experience building **UI components** using **Angular**, **TypeScript**, and JavaScript. Proficient in **HTML/CSS**, unit testing, and Agile development practices. Passionate about **K12 education technology** and creating well-engineered, user-focused solutions.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Web Technologies, Software Engineering, Analysis of Algorithms, Database Systems

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Data Structures, Web Development, Software Development Lifecycle

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Developed **Angular UI components** using **TypeScript** and modern JavaScript, creating reusable component libraries following **well-engineered standards** in the UI space.
- Wrote **unit tests** and automated code validation tests using Jasmine/Karma, debugging and testing code to achieve desired results with high degree of quality.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Built **Angular** frontend applications with **TypeScript, HTML, and CSS**, supporting core UI foundational technology and driving component creation/management.
- Used **Agile** planning, estimation, communication and release processes, able to handle multiple assignments simultaneously while maintaining positive work relationships.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Developed frontend interfaces using **Angular and TypeScript**, writing system documentation in support of code being developed and researching technical issues.
- Demonstrated self-motivation and ability to work independently while collaborating with cross-functional teams, achieving results within expected timeframes.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Developed **Angular UI components** with **TypeScript, JavaScript, HTML, and CSS**, evaluating quality of requirements, designs, and tests in **Agile** environment.
- Created **unit and automated code validation tests**, using coding tools, ticketing systems, build pipelines, and code repositories following software development lifecycle.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built **UI components** using **Angular, TypeScript, and JavaScript**, familiar with software development lifecycle and well-engineered standards for development.
- Facilitated planning, estimation, and communication while maintaining positive and productive work relationships, demonstrating strong work ethic and passion for excellence.

Skills

Frontend: Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, UI component creation/management
Testing: Unit testing (Jasmine, Karma), automated code validation, debugging
Tools: Git, code repository, ticketing systems, build tools, VS Code
Practices: Agile, software development lifecycle, well-engineered UI standards

Projects

EduPortal | *Angular, TypeScript, HTML/CSS, Unit Testing*
- Built **K12 education platform** with Angular, creating reusable **UI components** for student information management with comprehensive unit tests and documentation.

StudyHub | *Angular, TypeScript, JavaScript, Jasmine/Karma*
- Developed **EdTech learning application** with Angular frontend, driving well-engineered standards through **UI component creation** and automated testing workflows.

FinNexus Live | *Angular, TypeScript, HTML/CSS*
- Created financial dashboard with **Angular and TypeScript**, building responsive **UI components** following component management best practices and Agile methodology.
