Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full stack engineer with 2+ years building web applications using **Node.js, React, and TypeScript**. Experienced with **NestJS**, AWS services, and both relational and non-relational databases. Strong collaborator comfortable working in distributed, remote teams using **Agile methodologies**.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Web Technologies, Database Systems, Software Engineering, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Full Stack Development, Data Structures, Database Management, Software Engineering

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Developed **full stack applications** using **React** frontend and **Node.js/TypeScript** backend, deploying to **AWS** with containerized services handling 5K+ monthly requests.
- Collaborated with distributed team using **Agile methodologies**, participating in daily standups and utilizing Jira for project tracking while communicating primarily through Slack.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Built **React** components and **Node.js/TypeScript** APIs using **NestJS** framework, demonstrating initiative by independently ramping up on existing codebase and documentation.
- Deployed microservices on **AWS** with **Kubernetes** orchestration, working collaboratively with remote team members across multiple time zones using Scrum practices.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Developed data processing pipelines using Python and **PostgreSQL**, demonstrating problem-solving focus by resolving issues independently before escalating questions.
- Built internal tools with **React** frontend, improving team productivity by 18% through self-driven initiative and ability to find and utilize documentation independently.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Developed **full stack features** using **React, Node.js, and TypeScript**, implementing RESTful APIs with **NestJS** and deploying to **AWS** infrastructure.
- Worked with **PostgreSQL and MongoDB** databases, ensuring no loss of critical features customers relied on while modernizing and scaling existing projects.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **React** frontend components and **Node.js** backend services, participating in code reviews and Kanban workflow while ramping up quickly on legacy codebase.
- Contributed to **full stack development** with demonstrated drive and initiative, collaborating closely with distributed team using Agile practices.

Skills

Frontend: React, TypeScript, JavaScript, HTML/CSS, responsive design
Backend: Node.js, NestJS, Express, TypeScript, RESTful APIs
Databases: PostgreSQL, MySQL, MongoDB, relational and non-relational databases
Cloud & DevOps: AWS (EC2, S3, Lambda), Kubernetes, Docker, CI/CD, Git

Projects

FinNexus Live | *React, Node.js, TypeScript, MongoDB, AWS*

- Built a **full stack financial platform** with React frontend and Node.js/TypeScript backend, serving 50K+ users with responsive design and RESTful APIs deployed on AWS.

Big-Brain Live | *React, TypeScript, Node.js, PostgreSQL*

- Developed a **full stack document intelligence application** using React and TypeScript, implementing NestJS backend with PostgreSQL for scalable data management.

StudyHub | *React, NestJS, TypeScript, PostgreSQL, Kubernetes*

- Created an **EdTech learning platform** with assessment features, React frontend and NestJS backend deployed on AWS with Kubernetes for distributed team collaboration.
