Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Back-end engineer with 2+ years building web applications using **Python** and modern frameworks (Flask, FastAPI, Django fundamentals). Experienced with **RESTful APIs**, Git-based workflows, and continuous deployment in collaborative team environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Web Technologies, Database Systems, Software Engineering, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Data Structures, Web Development, Database Management

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built and maintained **Python back-end services** using FastAPI, developing RESTful APIs that process 5K+ monthly requests with high reliability in a continuous deployment environment.
- Collaborated via **Git using feature branches**, demonstrating strong verbal and written communication skills while working closely with cross-functional teams to build internal tools.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed **Python back-end applications** handling 10K+ daily requests, building RESTful APIs and collaborating with the engineering team using Git-based feature branch workflows.
- Demonstrated innate curiosity and desire to learn, quickly picking up new technologies while maintaining thoughtfulness and awareness about code quality and team collaboration.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Built **Python back-end services** for data processing pipelines, demonstrating self-motivation and love for building things while improving system performance by 18%.
- Worked closely with existing research team, showing empathy and awareness in collaborative environment while delivering high-quality, well-documented code.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Designed and built **Python back-end services using Flask**, developing RESTful APIs in a continuous deployment environment with Git feature branches and automated testing.
- Improved system efficiency by **68%** through thoughtful architecture decisions, demonstrating strong problem-solving skills while maintaining excellent team communication.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed **back-end services with Node.js and Python**, building RESTful APIs while gaining appreciation for UI/UX design through front-end collaboration with React.
- Collaborated with friendly, supportive team using Git workflows, demonstrating inclusiveness and open-mindedness while contributing to various internal projects.

Skills

Back-End: Python, Django basics, Flask, FastAPI, Node.js, RESTful API development
Databases: PostgreSQL, MySQL, MongoDB, SQL queries, data modeling
Tools & Practices: Git (feature branches), CI/CD, continuous deployment, Docker
Front-End Awareness: React, JavaScript, HTML/CSS, UI/UX design sensibility

Projects

Big-Brain Live | *Python, Flask, PostgreSQL, RESTful APIs*
- Built **Python back-end** with RESTful APIs processing 50K+ document queries, using Git feature branches and continuous deployment for rapid iteration and high code quality.

FinNexus Live | *Python, Node.js, MongoDB, React*
- Developed **back-end services** with RESTful APIs supporting 50K+ users, demonstrating thoughtful architecture and UI/UX awareness through integrated front-end development.

Chat2SQL Code | *Python, Flask, MySQL, Git*
- Created **Python/Flask back-end** for natural language to SQL conversion, using Git workflows and demonstrating curiosity for innovative solutions in data querying.
