Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

AI-native product engineer with 2+ years shipping full-stack software using **TypeScript, React, and Next.js**. Experienced building **REST APIs**, **webhook pipelines**, and **PostgreSQL** data workflows on **AWS**. Daily user of **Cursor, Claude Code, and GitHub Copilot** to write, debug, and deliver production features faster.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Web Technologies, Database Systems, Software Engineering, Machine Learning

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Full Stack Development, Data Structures, Database Management, Software Engineering

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built and shipped features across **Next.js/React** frontends and **serverless APIs** on **AWS**, using **Cursor and Claude Code** daily to accelerate implementation, testing, and debugging.
- Implemented **event-driven workflows** with webhooks and queue-backed processing, writing clean, well-tested code and contributing to **CI/CD** and infrastructure automation.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed internal tools and integrations using **TypeScript, Node.js, and REST APIs**, connecting third-party SaaS systems via **OAuth 2.0** and webhook pipelines.
- Collaborated in Git-based workflows with senior engineers, picking up API patterns quickly and delivering working software used by real teams.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Explored practical **LLM applications** including content extraction and conversational interfaces using Anthropic and OpenAI APIs under technical mentorship.
- Built database-backed state workflows in **PostgreSQL**, demonstrating curiosity for how platforms connect and automate end-to-end processes.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Shipped full-stack enterprise features with **React, TypeScript, and Node/Express**, integrating external platforms through **REST APIs** and secure authentication flows.
- Helped internal teams safely interact with platform data through role-based tooling, documentation, and reliable backend services with automated tests.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Contributed to collaborative development using **Git**, writing maintainable **JavaScript/TypeScript** code and learning relational data modeling with **Prisma-style ORM** patterns.
- Used **GitHub Copilot** and AI assistants to move faster while applying judgment on architecture, edge cases, and production readiness.

Skills

Frontend: TypeScript, JavaScript, React, Next.js, HTML/CSS
Backend: Node.js, Express, serverless functions, REST APIs, webhooks, OAuth 2.0
Data & Cloud: PostgreSQL, Prisma basics, AWS, event-driven automation, relational modeling
AI-Native Workflow: Cursor, Claude Code, GitHub Copilot, LLM APIs, CI/CD, Git, CLI tooling

Projects

PlatformBridge | *Next.js, TypeScript, REST APIs, Webhooks, OAuth*

- Built enterprise-style integration hub connecting SaaS platforms through **REST APIs and webhook pipelines**, with OAuth authentication and database-backed workflow state.

Big-Brain Live Code | *Next.js, TypeScript, LLM APIs, AWS*

- Shipped AI-native web app with **content extraction and conversational UI**, built primarily with **Cursor/Claude-assisted** development and production deployment.

FinNexus Live | *React, TypeScript, Node.js, PostgreSQL*

- Delivered full-stack product with internal dashboards and API integrations, demonstrating ability to ship working software solving real workflow problems.
