Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Backend engineer with 2+ years building **Python/Java APIs**, high-throughput **data ingestion pipelines**, and **PostgreSQL** services on **AWS**. Startup experience integrating third-party systems; motivated to grow in healthcare infrastructure and production distributed systems.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Database Systems, Analysis of Algorithms, Software Engineering, Computer Networks

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Data Structures, Object-Oriented Programming, Operating Systems, Software Engineering

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **Python/FastAPI backend services** and integration pipelines processing 5K+ monthly jobs for 500+ users, reducing API latency from **1.2s to 350ms** via **PostgreSQL/SQL** tuning and scalable storage patterns.
- Shipped production-ready features with automated validation, CI/CD releases, and distributed-system debugging, achieving 99%+ reliability across cross-platform data workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **Python/Flask APIs** in a fast-paced startup, handling 10K+ daily requests while collaborating on code reviews, scoping, and end-to-end feature delivery with product and engineering partners.
- Investigated production issues and improved system responsiveness by **60%**, building pattern recognition for debugging real customer-facing workflows.

USC AD Labs **Los Angeles, CA**
Software Engineering Assistant *January 2025 – May 2025*

- Implemented high-volume data processing services across 100K+ records with reproducible tests and clear technical communication in architecture and design discussions.
- Contributed documentation and review feedback to strengthen team context and engineering quality in iterative delivery.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **Java/Python microservices** and **third-party API integrations** on **AWS**, improving response time by **30%** through maintainable backend architecture and webhook-style data movement.
- Maintained **20+ automated test suites** and Jenkins CI/CD pipelines, increasing deployment confidence by **68%** in collaborative Agile teams.

Aasma Technology Solutions **India**
Backend Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **Node.js REST APIs** with **PostgreSQL/MongoDB**, supporting low-latency data serving and real-time synchronization across 2M+ records in distributed workflows.
- Automated **Docker** deployments with Jenkins, cutting release cycles by **50%** and improving operational support readiness.

Skills

Backend: **Python**, Java, Go (familiar), Ruby/Rails (learning), REST APIs, webhooks, integration design
Data: **PostgreSQL**, MySQL, MongoDB, SQL optimization, ingestion pipelines, schema design
Infrastructure: **AWS**, Docker, CI/CD, Git, distributed systems debugging, startup delivery mindset

Projects

HealthBridge Platform | *TypeScript, APIs, Healthcare Integrations*

- Built a microservice healthcare platform integrating external **patient-record APIs**, appointment workflows, and consent-based data access for 100+ daily provider operations.

Linguistix Code | *Python, AWS, Docker, Data Pipelines*

- Deployed a production-style **Python API** on AWS with pipeline automation and validation gates for high-throughput backend processing.

Chat2SQL Code | *Java, PostgreSQL, Docker, API Design*

- Developed backend services with multi-database integrations and query optimization across 10+ relational systems in a cross-platform developer tool.
