Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack engineer with **shipped projects** using **React, TypeScript, Node/Express**, and **PostgreSQL**. Experienced with **AI APIs** (Anthropic, OpenAI) and fluent with **AI coding tools** like Cursor. Thrives in fast-moving startup environments with full technical ownership.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Web Technologies, Database Systems, Machine Learning, Software Engineering

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Full Stack Development, Data Structures, Database Management, AI/ML

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built production-solid full-stack features using **React, TypeScript, and Node/Express**, shipping directly alongside product teams with full context on every decision.
- Integrated **multi-provider AI APIs** (Anthropic Claude, OpenAI) for intelligent features, leveraging **Cursor and AI coding tools** to move fast and ship quality code.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Owned technical direction for **AI-native web app** features using **React/TypeScript** frontend and **Node/Express** backend with **PostgreSQL** and Supabase.
- Shipped new features in fast-paced startup environment, communicating clearly with non-technical founders while pitching solutions and moving fast.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Developed **AI-powered academic tools** integrating OpenAI and Anthropic APIs, auditing and refactoring existing codebases to make them production-ready.
- Led technical strategy for research tools, demonstrating eagerness to own technical direction with genuine fluency in AI workflows.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Built full-stack applications with **React, TypeScript, Node/Express, and PostgreSQL**, implementing **Stripe** payment integration for SaaS features.
- Worked in early-stage startup environment with full ownership, shipping features directly alongside founders with no bureaucracy.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Shipped **production features** using React and Node.js in startup setting, demonstrating strong fundamentals and ability to move fast.
- Communicated effectively with non-technical stakeholders, eager to own problems and deliver solutions in fast-moving environment.

Skills

Frontend: React, TypeScript, JavaScript, HTML/CSS, responsive design
Backend: Node.js, Express, PostgreSQL, Supabase, REST APIs, Stripe
AI: Multi-provider AI APIs (Anthropic Claude, OpenAI, Google AI), prompt engineering
Tools: Cursor, Git, Railway, Vercel, AI coding workflows, fast shipping

Projects

Big-Brain Live Code | *React, TypeScript, Node/Express, AI APIs*

- **Shipped AI-powered academic workspace** integrating Anthropic and OpenAI APIs, built with React/TypeScript frontend and Node backend — production-solid and live.

FinNexus Live Code | *React, TypeScript, PostgreSQL, Stripe*

- **Shipped full-stack SaaS** with React/TypeScript, PostgreSQL, and Stripe payments — demonstrates founding engineer skills with complete technical ownership.

Chat2SQL Code | *React, Node/Express, PostgreSQL, OpenAI API*

- **AI-native tool** converting natural language to SQL using OpenAI API — showcases multi-provider AI integration and fast shipping mindset.
