Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack engineer with 2+ years building **React/TypeScript/Node.js** services, **SQL** data layers, and **AWS** deployments. Experienced in **authentication flows**, unit/smoke testing, **GitHub Actions** CI/CD, and collaborative delivery through pairing, code reviews, and production triage.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Database Systems, Software Engineering, Web Technologies, Computer Networks

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Object-Oriented Programming, Data Structures, Operating Systems

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built platform services with **TypeScript/Python APIs** and **PostgreSQL/SQL Server**, serving 500+ users while reducing dashboard latency from **1.2s to 350ms** through query tuning and defensive data-access patterns.
- Shipped CI/CD-backed releases for 5K+ monthly integration jobs with unit validation, smoke checks, and log-driven debugging to maintain **99%+ reliability** across production workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **React + Flask** features with **auth workflows** and REST APIs for 150+ users, participating in pairing, code reviews, and Agile planning while handling **10K+ daily requests**.
- Automated deployments with **GitHub Actions**, wrote unit tests for core modules, and reduced feedback turnaround by **60%** through iterative debugging with senior engineers.

USC AD Labs **Los Angeles, CA**
Software Engineering Assistant *January 2025 – May 2025*

- Contributed to data processing services across 100K+ records with reproducible tests, documentation, and careful investigation of edge cases in complex legacy-style research systems.
- Supported team quality practices through structured reviews, smoke-test scenarios, and clear communication in standups and design discussions.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Maintained shared **AWS microservices** and integration APIs with relational schemas, improving response time by **30%** and triaging production issues using logs and observability tooling.
- Expanded **20+ automated test suites** and Jenkins/**GitHub Actions** pipelines, increasing release confidence by **68%** through code review and defensive programming practices.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **React/Node.js** modules with **JWT authentication**, role-based access, and **Azure SQL** persistence across billing and customer workflows spanning 2M+ records.
- Wrote **Jest/Mocha unit tests** and Docker/Jenkins release automation, cutting deployment time by **50%** while improving maintainability of commerce-adjacent platform services.

Skills

Full Stack: **React**, **TypeScript**, **Node.js**, Python, REST APIs, authentication flows
Platform: **AWS**, **GitHub Actions**, Terraform (familiar), Docker, CI/CD, SAML/OIDC concepts
Data & Quality: **PostgreSQL**, SQL Server, Azure SQL, unit/smoke testing, pairing, on-call triage mindset

Projects

IdentityBridge | *Node.js, React, TypeScript, OIDC/SAML*

- Implemented enterprise-style login flows with **OIDC and SAML** integration patterns, session handling, and role-aware routing for multi-tenant application access.

StudyHub | *Next.js, TypeScript, PostgreSQL, AWS*

- Built a learning-pathway platform with course catalog APIs, progress tracking, and SQL-backed assessments supporting personalized workforce-style training workflows.

Chat2SQL Code | *TypeScript, Java, SQL, Docker*

- Developed full-stack data services across 10+ relational databases with schema exploration, unhappy-path error handling, and production-style local deployment workflows.
