Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack engineer with 2+ years shipping **React** product features and **AWS**-backed services with strong ownership, fast iteration, and production reliability. Experienced building customer-facing workflows, APIs, and data pipelines; actively building with **Golang** and **GraphQL**.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Database Systems, Web Technologies, Software Engineering, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Owned end-to-end delivery of **Python/AWS backend services** for 500+ users, cutting latency from **1.2s to 350ms** through SQL optimization, validation automation, and rapid production iteration with minimal process overhead.
- Shipped reliable **real-time data pipelines** (5K+ monthly jobs) with CI/CD and self-directed debugging, achieving 99%+ uptime for operational workflows used by internal customer-success-style teams.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Built and shipped **React + REST API** features handling 10K+ daily requests, owning implementation details from requirements through deployment in a fast-moving startup environment.
- Reduced customer turnaround time by **60%** by integrating AI services into support-like grading workflows while maintaining stable production performance under load.

USC AD Labs **Los Angeles, CA**
Software Engineer *January 2025 – May 2025*

- Delivered **high-throughput data services** across 100K+ records with reproducible testing, autonomous task ownership, and clear documentation for cross-functional collaborators.
- Improved engineering velocity through focused execution, code review participation, and pragmatic tradeoffs between speed and quality.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Built **AWS microservices** (Glue, S3, APIs) and integration workflows, improving response time by **30%** while independently driving fixes across production customer data pipelines.
- Expanded automated test coverage with Jenkins CI/CD (20+ suites), increasing release confidence by **68%** and reducing regressions in frequent ship cycles.

StreamTech Labs **India**
Backend Engineer Intern *May 2023 – August 2023*

- Developed **Golang services** and **GraphQL** endpoints with **React** clients for B2B workflow tooling, deploying containerized releases on **AWS** with observability-focused error handling.
- Automated Docker/Jenkins pipelines, cutting release cycles by **50%** and supporting rapid feature shipping with strong fundamentals in concurrency and API design.

Skills

Stack: **React**, TypeScript, **Golang**, **GraphQL**, Python, SQL, JavaScript
Cloud: **AWS** (ECS, S3, Lambda, RDS), Docker, CI/CD, Git/GitHub, REST and event-driven APIs
Strengths: Strong fundamentals, autonomous ownership, fast shipping, production debugging, B2B workflow systems

Projects

SupportFlow | *React, Golang, GraphQL, AWS*

- Built a B2B-style support operations prototype with **GraphQL APIs**, **Go** backend services, and a **React** dashboard for real-time customer workflow visibility.

PiXMod Live | *React, Next.js, MongoDB, Stripe*

- Shipped a production **React SaaS** product with billing integrations and iterative feature delivery used by real customers.

Linguistix Code | *Python, AWS ECS, Docker, CI/CD*

- Deployed a scalable **AWS** API service with automated pipelines and production-grade reliability patterns for high-request workloads.
