Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer with 2+ years in **web and mobile application testing**, **manual and automated QA**, and **API validation** using **Python/Java**, **Playwright**, **Selenium**, and **Appium** in fast-paced product environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Software Engineering, Database Systems, Web Technologies, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer (Quality Focus) *September 2025 – Present*

- Designed and executed **automated validation test plans** for web platform features serving 500+ users, including regression checks, API/data reconciliation tests, and release-readiness validation across dev/test environments.
- Documented defects, triaged failures in 5K+ monthly pipeline jobs, and partnered with engineers on root-cause fixes while improving test coverage and production quality signals.

Grad8 **Los Angeles, CA**
Quality Engineering Intern *June 2025 – August 2025*

- Performed **manual and automated testing** for **React web applications** and **Flask REST APIs** handling 10K+ daily requests, validating frontend-backend integrations and user workflows before production releases.
- Collaborated with engineers and product stakeholders on test feedback, exploratory testing, and defect tracking during Agile delivery of instructor-facing features.

USC AD Labs **Los Angeles, CA**
Software Engineering Assistant *January 2025 – May 2025*

- Built **reproducible test scenarios and evaluation harnesses** across 100K+ data records, supporting functional validation, regression comparisons, and structured test documentation for research platforms.
- Authored test reports and quality notes for cross-functional review, reducing ambiguity in release criteria and strengthening validation practices across the team.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Maintained **20+ automated test suites** (PyTest, Mockito) in Jenkins CI/CD, executing regression and API integration tests that improved release reliability by **68%** across microservices.
- Validated **RESTful service integrations** on AWS, identifying defects in ETL/API flows and coordinating fixes with engineering teams using structured bug documentation.

TestCore Systems **India**
QA Automation Intern *January 2023 – April 2023*

- Developed **end-to-end web tests** with **Playwright and Selenium**, plus **mobile UI checks** with **Appium**, covering functional, regression, and exploratory test cases for customer-facing applications.
- Implemented **Python API test scripts** for REST services, integrated results with defect tracking workflows, and supported release validation for high-priority feature launches.

Skills

Testing: Mobile (iOS/Android) and web QA, manual/exploratory/regression testing, test plans and cases, release validation
Automation: **Playwright**, **Selenium**, **Appium**, E2E suites, API testing (REST), test framework maintenance
Languages: **Python**, **Java**, JavaScript/TypeScript, SQL
Tools: Jira-style defect tracking, Git, Jenkins, CI/CD, PyTest, React/web and API integration validation

Projects

WebFlow E2E Suite | *Playwright, Selenium, Python*

- Built automated **web end-to-end test suites** with regression and functional coverage, validating UI flows and backend API responses for release-ready quality checks.

APIValidator | *Python, REST API Testing, Java*

- Created reusable **REST API test harnesses** with assertion libraries and test data fixtures, accelerating integration validation between frontend clients and backend services.

MobileCheck Automator | *Appium, Python, Android/iOS*

- Implemented **mobile automation scripts** for core user journeys, supporting cross-platform regression testing and defect reproduction workflows for app releases.
