Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack engineer with 2+ years building applications using **Python** and **TypeScript**. Experienced with **FastAPI**, **React**, and cloud infrastructure. Passionate about **AI/ML** and **open-source** development. Eager to learn, tackle challenges, and contribute to scalable AI infrastructure.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Machine Learning, Distributed Systems, Web Technologies, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Data Structures, Software Engineering, Machine Learning, Web Development

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Developed full-stack features using **Python (FastAPI, Pydantic)** backend and **TypeScript/React** frontend, writing clean, maintainable code with emphasis on performance and scalability.
- Deployed applications using **Docker** containerization on cloud platforms, participating in code reviews and **continuous integration** best practices.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Built and maintained user interfaces and **APIs** using **Python and TypeScript**, contributing to frontend and backend development with **React and FastAPI**.
- Collaborated with cross-functional teams to develop features and address bugs, eager to tackle challenges and learn from feedback in dynamic environment.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Developed tools bridging **AI engineering and scalable infrastructure** using **Python**, supporting ML workflows with emphasis on performance and code quality.
- Contributed to **open-source** internal tools, demonstrating enthusiasm for collaborative development and continuous learning to deepen expertise.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Built full-stack applications using **Python (FastAPI, Pydantic)** and **TypeScript/React**, deploying with **Docker** on **AWS** cloud infrastructure.
- Followed best practices for **testing and continuous integration**, communicating technical concepts clearly with developers and non-technical team members.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed frontend and backend components using **Python, TypeScript, HTML, CSS**, and JavaScript frameworks, using **Git** and version control workflows.
- Demonstrated problem-solving skills and passion for learning, working collaboratively within team while growing full-stack development expertise.

Skills

Languages: Python, TypeScript, JavaScript, Go basics, HTML, CSS
Frameworks: FastAPI, Pydantic, React, Express, Node.js
Cloud & DevOps: Docker, AWS, GCP, Kubernetes, CI/CD, distributed computing
Tools: Git, GitHub, open-source development, testing frameworks

Projects

Big-Brain Live Code | *Python (FastAPI), TypeScript/React, Docker*

- Built **AI-powered** document intelligence platform with Python/FastAPI backend and React frontend, containerized with Docker demonstrating full-stack and **open-source** skills.

FinNexus Live Code | *Python, TypeScript, React, AWS*

- Developed full-stack platform with **Python backend and TypeScript/React** frontend, deployed on AWS with clean, maintainable code following modern best practices.

Chat2SQL Code | *Python, FastAPI, Pydantic, Git*

- Created **open-source** tool using Python/FastAPI with Pydantic validation, showcasing full-stack experience and enthusiasm for open-source contributions.
