Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | sahaj-bhadja | sahajbhadja | sahaj-bhadja

Summary

Associate-level full-stack engineer with 2+ years building **Python/Java backends**, **REST APIs**, and **Next.js/React** applications on **AWS** with **CI/CD**, automated testing, and Agile delivery in collaborative product teams.

Education

University of Southern California, Los Angeles, CA — **August 2024 – May 2026**
Master of Science in Computer Science — *GPA: 3.75/4.0*
Coursework: Database Systems, Web Technologies, Software Engineering, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India — **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering — *GPA: 3.88/4.0*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife — **Los Angeles, CA**
Software Engineer — *September 2025 – Present*

- Developed **Python/FastAPI backend services** and **REST integrations** for 500+ users, reducing latency from **1.2s to 350ms** through SQL tuning, validation checks, and production troubleshooting across dev/test environments.
- Built **ETL-style pipelines** processing 5K+ monthly jobs with automated reconciliation, CI/CD releases, and defect triage, achieving 99%+ reliability while following secure data-handling practices.

Grad8 — **Los Angeles, CA**
Software Engineer Intern — *June 2025 – August 2025*

- Shipped **full-stack features** with **Flask APIs and React** handling 10K+ daily requests, participating in code reviews and Agile delivery while translating requirements into maintainable, documented services.
- Integrated external AI/OCR services into grading workflows, reducing turnaround by **60%** and resolving production defects through structured debugging and cross-functional collaboration.

USC AD Labs — **Los Angeles, CA**
Software Engineering Assistant — *January 2025 – May 2025*

- Implemented **Python data pipelines** across 100K+ records with reproducible test scenarios, supporting quality practices and incremental delivery in a research engineering team.
- Authored technical documentation and review-ready reports, improving knowledge sharing, reducing handoff ambiguity, and strengthening engineering standards across collaborators.

Aasma Technology Solutions — **India**
Software Developer Engineer - (SecureSync) — *August 2023 – July 2024*

- Engineered **API microservices** on **AWS** (Glue, S3) with relational data workflows, improving response time by **30%** and supporting integrations between internal platforms and external systems.
- Maintained **20+ automated test suites** with Jenkins and PyTest, increasing CI reliability by **68%** and reducing regressions across frequent Agile releases.

Aasma Technology Solutions — **India**
Full Stack Developer Intern - (VibrantChem) — *May 2023 – August 2023*

- Built **MERN modules and WebSocket integrations** syncing 2M+ records across workflows, delivering responsive user experiences and stable real-time API behavior under load.
- Automated **Docker/Jenkins CI/CD** pipelines, cutting release time by **50%** and improving deployment consistency across development, test, and production environments.

Skills

Languages: **Python**, **TypeScript**, JavaScript, Java, SQL, Go (familiar), Bash
Frontend: **Next.js**, **React**, responsive UI, client-side API integration, state management
Backend: FastAPI, Flask, Node.js, REST APIs, microservices patterns, event-driven concepts
Data & Cloud: PostgreSQL, MySQL, MongoDB, **AWS** (S3, Glue, ECS, Lambda exposure), serverless basics
Delivery: Git/GitHub, **GitHub Actions**, Jenkins, Docker, Terraform basics, Agile/Scrum, automated testing

Projects

PiXMod Live | *Next.js, React, MongoDB, REST APIs*

- Built a **cloud-native Next.js SaaS** with Stripe billing, MongoDB persistence, and secure API integrations, delivering responsive UX and incremental feature releases.

Linguistix Code | *Python, AWS ECS, CI/CD, Docker*

- Deployed a **containerized REST API** on AWS with pipeline automation and validation gates, mirroring production CI/CD and automated deployment practices.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Built a **full-stack SQL workspace** with Java/TypeScript services, relational database integrations, and Docker workflows for 10+ database backends.
