Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Web developer with 2+ years building **client-side applications using React.js** and similar frameworks. Experienced in full software development lifecycle, Git version control, troubleshooting, testing, and technical documentation.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Web Technologies, Database Systems, Software Engineering, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Web Development, Data Structures, Database Management

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Developed **client-side applications using React.js**, building responsive single-page applications (SPAs) while assisting with all stages of software development lifecycle from requirements to testing.
- Enhanced and maintained **existing web-based applications**, troubleshooting user experience issues and testing software for responsiveness and efficiency across production systems.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Built **web applications using React.js** and JavaScript frameworks, responding to and troubleshooting user experience issues while debugging and upgrading software as required.
- Collaborated with cross-functional teams using **Git version control**, drafting technical documentation and contributing to software testing for responsiveness and efficiency.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Developed **web-based data management interfaces** using Python, demonstrating ability to quickly learn new languages and frameworks while working independently with minimal supervision.
- Collaborated with multidisciplinary team, creating **technical documentation** and knowledgebase articles while maintaining excellent organizational skills and attention to detail.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Developed **web-based applications using React.js** and client-side frameworks, participating in full SDLC including requirements gathering, design, development, implementation, and testing.
- Created and implemented **security and data protection settings**, troubleshooting and debugging software while working effectively both individually and collaborating with team members.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Enhanced and maintained **existing web-based applications** using React, Node.js, and JavaScript, administering web infrastructure and responding to user experience issues.
- Drafted **technical documentation** and participated in client meetings, demonstrating effective communication skills and self-motivated work ethic with proactive customer service.

Skills

Client-Side: React.js, JavaScript, TypeScript, HTML, CSS, Single Page Applications (SPAs)
Server-Side: Node.js, Python, Flask, FastAPI, RESTful APIs, Web API development
Tools & Practices: Git, Azure DevOps basics, CI/CD, testing, debugging, technical documentation
Databases: PostgreSQL, MySQL, MongoDB, SQL queries

Projects

FinNexus Live | *React.js, TypeScript, Node.js, MongoDB*

- Developed **single-page application using React.js**, building responsive client-side interface with real-time data management supporting 50K+ users while implementing security and data protection.

Big-Brain Live | *React.js, Python, PostgreSQL, REST APIs*

- Built **web-based data management application** with React.js frontend, implementing responsive user interface and testing software for efficiency across 50K+ document queries.

Chat2SQL Code | *React.js, Python, MySQL, Git*

- Developed **client-side application using React.js** for data querying interface, utilizing Git version control and creating technical documentation for web solution deployment.
