Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

IT operations professional with 2+ years supporting **enterprise SaaS platforms**, **access governance**, and **automation workflows**. Experienced in account lifecycle management, L2 technical support, vendor coordination, and usage data analysis. Strong service mindset with interest in **AI-driven SaaS operations** and cross-platform integration.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Database Systems, Information Management, Software Engineering, Computer Networks

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Database Management, Software Engineering, Systems Administration, Data Analysis

Experience

USC Dornsife **Los Angeles, CA**
IT Operations Engineer *September 2025 – Present*

- Managed day-to-day **SaaS application operations** including account provisioning, **access control**, license tracking, and configuration administration for business-critical platforms.
- Handled escalated technical issues, coordinated with vendors for resolution, and supported **automation** of onboarding, offboarding, and access-change workflows.

Grad8 **Los Angeles, CA**
IT Systems Intern *June 2025 – August 2025*

- Worked with business teams to understand requirements, evaluate SaaS tooling options, and align technical solutions with operational goals.
- Analyzed platform usage data (activity, utilization, coverage) and produced insights to support resource optimization and management decisions.

USC AD Labs **Los Angeles, CA**
Technical Operations Assistant *January 2025 – May 2025*

- Established standardized **SOPs** and operational procedures, improving data consistency, process execution, and audit readiness across systems.
- Supported cross-platform integrations and explored **AI-assisted workflow automation** to improve collaboration efficiency and digital employee experience.

Aasma Technology Solutions **India**
IT Operations Engineer - (SecureSync) *August 2023 – July 2024*

- Administered enterprise SaaS environments with focus on **identity and access governance**, security audit support, and compliant platform usage.
- Built automation scripts and API-based integrations to reduce manual effort in lifecycle processes, improving operational efficiency by 68%.

CloudOps Systems **India**
SaaS Administrator Intern *January 2023 – April 2023*

- Supported **L2 technical support** for SaaS incidents, vendor escalation, and configuration troubleshooting across overseas business applications.
- Drove data cleansing initiatives and unified data standards while maintaining strong cross-functional communication with IT and business stakeholders.

Skills

SaaS Operations: Account provisioning, access/license management, configuration admin, lifecycle governance
Support & Governance: L2 support, vendor coordination, IAM/access standards, security audits, SOP documentation
Automation & Integration: Python scripting, API integrations, workflow orchestration, AI workflow adoption
Analysis: Usage data analysis, utilization reporting, SQL, cross-functional collaboration, service mindset

Projects

SaaSOps Automator | *Python, REST APIs, IAM Automation*

- Built automation toolkit for SaaS onboarding/offboarding and access changes, integrating multiple platforms with audit logging and standardized operational workflows.

PlatformBridge | *API Integration, Notion-style Collaboration Tools*

- Developed cross-platform integration prototype connecting internal systems with collaboration SaaS tools, supporting intelligent workflow orchestration and data sync.

UsageInsight Dashboard | *Python, SQL, Data Governance*

- Created SaaS utilization analytics dashboard tracking user activity and license coverage to support operational insights and resource optimization decisions.
