Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Database-focused analyst with 2+ years maintaining **PostgreSQL/SQL Server** systems, writing multi-table **SQL** validation queries, and performing **data audits** with traceable documentation. Skilled in **Excel** reporting (pivots, XLOOKUP, Power Query), requirements gathering, and **AWS RDS/S3/Glue** data workflows.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Database Systems, Software Engineering, Analysis of Algorithms, Computer Networks

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Data Structures, Software Engineering, Operating Systems, Object-Oriented Programming

Experience

USC Dornsife **Los Angeles, CA**
IT Software Engineer Analyst *September 2025 – Present*

- Maintain and audit **PostgreSQL/SQL Server** schemas for 500+ users, writing joins, aggregations, and validation checks that improved query performance by **35%** while preserving data integrity and traceability.
- Perform **data quality reconciliation** on 5K+ monthly ETL jobs, documenting root causes, field mappings, change logs, and remediation steps to achieve **99%+ accuracy** in production datasets.

Grad8 **Los Angeles, CA**
Database Analyst Intern *June 2025 – August 2025*

- Partnered with instructors to gather requirements, challenge ambiguous requests, and translate needs into **MySQL/AWS RDS** table definitions and reporting logic for 150+ users.
- Built **Excel audit workbooks** with pivot tables and lookup validation to verify grading datasets across 10K+ daily records, documenting discrepancies and repeatable fix procedures.

USC AD Labs **Los Angeles, CA**
Data Systems Assistant *January 2025 – May 2025*

- Investigated inconsistencies across 100K+ research records, validating assumptions with stakeholders and producing audit findings with clear remediation recommendations.
- Created table-definition documentation and validation scenarios to support repeatable data controls and cross-team review of update workflows.

Aasma Technology Solutions **India**
Data Integration Analyst - (SecureSync) *August 2023 – July 2024*

- Audited and improved **AWS Glue/S3/RDS** ETL pipelines, reviewing transformation logic for defects and edge cases while boosting pipeline efficiency by **68%**.
- Reconciled cross-system datasets, analyzed tradeoffs before implementing fixes, and maintained governance controls around permissions, updates, and production data access.

Aasma Technology Solutions **India**
Database Analyst Intern - (VibrantChem) *May 2023 – August 2023*

- Updated and audited **Azure SQL** asset and customer datasets spanning **2M+ records**, applying keys, constraints, and normalization concepts to reduce sync conflicts by **33%**.
- Supported engineering-style resource workflows with SQL reporting, Excel verification tools, and documented field mappings for billing and equipment allocation logic.

Skills

Database & SQL: **PostgreSQL**, SQL Server, MySQL, Azure SQL, joins/aggregations, constraints, normalization, data integrity
Analysis & Reporting: **Excel** (pivot tables, XLOOKUP/VLOOKUP, Power Query), data audits, reconciliation, requirements gathering
Cloud & Tools: **AWS RDS**, S3, Glue, IAM concepts, documentation, change logs, asset/time-series concepts (familiar)

Projects

DataAudit Toolkit | *PostgreSQL, Excel, Power Query*

- Built repeatable audit workflows combining SQL validation queries with Excel pivot and lookup reports to trace discrepancies, document causes, and verify remediation outcomes.

AssetView Dashboard | *SQL, Excel, Asset Reporting*

- Designed asset-tracking reports with equipment hierarchy mappings, acceptance criteria, and audit-ready verification checks for engineering-style operational datasets.

Chat2SQL Code | *SQL, PostgreSQL, Data Validation*

- Developed cross-database SQL exploration and validation tooling across 10+ relational systems with schema documentation and unhappy-path integrity checks.
